You'll find such information in the Manual of your corega CGWLAPL11 APL11 router. But if you do not have the manual for your router or you do not want to read the whole manual to find the default login information then you can use the quick guide below. To get to the router login page it's necessary that you are connected to the router. The default network name SSID is corega. After some seconds our tool will show a link to your router login page. Click on the shown link. There you will find your login credentials. If not then have a look at the manual of your router. Sometimes the username and password doesn't work that we mentioned in the top of this guide. Did you try the following IPs? In the list below we listed all known router IPs for the manufacturer corega. Maybe this will work for you. This can be done easily by clicking on the reset button at the back or at the bottom of your router. If you hold down this small button for approximately 20 seconds, you may have to use a toothpick, then your modem will get restored to the factory settings. What you need to keep in mind is that when you reset your modem, you will lose your connection online. It is therefore better to take an expert's assistance in this regard.
