Book Descriptions:

Corolla E90 Manual

The North American GTS coupe shared the same engine. The allwheel drive Sprinter Carib wagon used a beam axle rear suspension with coil springs, while the rest used struts all around. In South Africa, the E90 was manufactured and marketed by Toyota under the Carri, Conquest, and Tazz model names. In a pair of similar joint ventures with General Motors, E90 variants with minor cosmetic changes were locally manufactured and sold as the Geo Prizm and Holden Nova in the United States and Australia respectively. It retained the Sprinter Carib name in Japan, but was marketed as the Corolla Touring in Europe and some other countries, and as the Corolla AllTrac in the United States. It used an SC12 roots type supercharger and a top mounted intercooler that was fed cool air via a scoop on the bonnet. All engines were carbureted and without catalyts. Earlier XL variants came with 4speed manual transmissions, while later models would come with 5speed manual transmissions, hence the XL4 4speed and XL5 5Speed designations. Transmission was 5speed manual or 4speed automatic. Transmission was 5speed manual or 4speed automatic. The fivedoor liftback used the Japanese market Sprinter Cielo body in its entirety, although in Europe it was available with the little 1.3 liter engine as well. The second generation Sprinter Carib was also sold as a Corolla in Europe, where it replaced the Tercel Wagon. In Europe it was only sold with the comparatively spartan XL equipment level. In Sweden, the 4AGE equipped liftback was marketed as the Corolla CS Coupe Sport, beginning in May 1991. These two plants made 279,000 units, making a total of 4.5 million of this generation AE92 made. The North American models depart from the previous generations boxy styling, for a more contemporary look and improved aerodynamics. They feature longer bumpers and small red conspicuity lights on the rear quarter panels. Cabin air exits through stylish vents behind the rear side

It included 25th anniversary emblems on the front fender, embroidered on the front seat, and a threespoke steering wheel. The rear garnish was deleted for the base model. Trim levels are SR5 and GTS. The GTS is powered by 4AGE engine and comes with full body kits. In 1990 the 4AGE received a revised cylinder head and intake manifold. Horsepower jumped from 115 hp 86 kW to 118 hp 88 kW and 135 hp 100 kW. The Corolla AllTrac sedan was sold in very small numbers, shared the same body as the AE92 sedan, with the only visible difference being the tire size. The GSi version was equipped with the 4AGE. The Japanese built E90 has a JT2 VIN prefix while the NUMMI made E90 used 1NX Toyota and 1Y1 Geo VIN prefixes and the Cambridge built E90 has a 2T1 prefix. The sixth generation fivedoor hatchback that was made in South Africa was marketed as the Toyota Conquest. The twin cam version of this was also sold, as the GLi Twin Cam for the sedan and RSi for the Hatchback 4AGE, with 100 kW 136 PS. It was also sold as a panel van called the Conquest Carri. The higher end version was called the Conquest Zip which was powered by the 1.6l 4AFE engine. From October 2000 the car received a light facelift with a more ovoid front end treatment and the name was changed to simply Toyota Tazz. This model continued to be built until July 5, 2006. The first version of the Tazz was only offered with a 1300 cc engine, while the facelifted version offered two models 130, and 160i. The Conquest and Corolla were also available in the 1.8 liter 7AFE engined model beginning in September 1993; this replaced the earlier 1.6 Twin Cam in

the Conquest and was available in a number of equipment levels in the Corolla sedan, from GL to the mildly sporting GSX. Verona, Italy Arnoldo Mondadori. 2 54 14. Retrieved 22 June 2013. Second, There is no mention of whether the gearbox is auto or manual. Third, Please explain the reason for wanting a replacement gearbox. Typically with the manual gearboxes its the synchromesh that allows for smooth changing between gears that gets worn out. Toyota parts dealers can supply this part and a gearbox rebuild shop can do the work for you. To save money.

Suggest removing the gearbox yourself, taking it to a rebuilder and allowing them to source the new synchro and do the work, then you refit it. Its advisable to replace the clutch disc at the same time. If youd still rather buy a second hand box, just bear in mind you dont know what youre buying, it may also have synchro issues or be on the way out. The best insurance here is to buy one with low kms sub 200,000kms The best way to approach this is to call and email auto wreckers in your local area and the nearest major city and quote the following. Finally with considerable dismantling and reassembly work you can substitute using the more readily available early 5 speed Rav4 gearboxes listed here. This requires dismantling both gearboxes to swap over the clutch bellhousing because the Rav4s bell housing is designed to suite the Sseries engines. For general export, the trim levels are Base, XL, GL, SE, and SE Limited. The GTi was sold in limited numbers in certain countries. The all wheel drive Sprinter Carib wagon used a solid axle rear suspension with coil springs, while the rest used struts all around. The 4WD wagon was sold from 1988 to 1994 and had different bodywork to other Corollas. It was called the AllTrac in the US and sold with the Tercel or Corolla name in some countries. In general, all models depart from the previous generations boxy styling, for a more contemporary look and improved aerodynamics. The North American GTS coupe shared the same engine. The only model with 1.5 liter 5AFHE was SELimited G. The 4WD sedan is powered by the 1.6 liter 4AFE. The 1,456 cc 3E engine was only fitted to the Japanese market Van wagon version. The Sprinter sedan has a third window in the Cpillar. It used an SC12 roots type supercharger and a top mounted intercooler that was fed cool air via a scoop on the bonnet. This agreement paralleled two Corolla generations including both the E90 and E100 series.

The fivedoor liftback used the Japanese market Sprinter Cielo body in its entirety, although in Europe it was available with the little 1.3 liter engine as well. The second generation Sprinter Carib

was also sold as a Corolla in Europe, where it replaced the Tercel Wagon. For UK specification cars, this increased power from 124 bhp 92 kW to 129 bhp 96 kW. The GTi was available as a hatchback or a liftback, although not all markets received both bodystyles. In Sweden, the 4AGE equipped liftback was marketed as the Corolla CS Coupe Sport, beginning in May 1991. It had the new 125 PS 92 kW version of the 4AGE engine and ventilated disc brakes all around. These two plants made 279,000 units, making a total of 4.5 million of this generation AE92 made. The North American models depart from the previous generations boxy styling, for a more contemporary look and improved aerodynamics. They feature longer bumpers and small red conspicuity lights on the rear quarter panels. Cabin air exits through stylish vents behind the rear side windows. It included 25th anniversary emblems on the front fender, embroidered on front seat and a 3-spoke steering wheel. Rear garnish was deleted for the Base model. Trim levels are SR5 and GTS. The GTS is powered by 4AGE engine, and comes with full body kits. In 1990 the 4AGE received a revised cylinder head and intake manifold. Horsepower jumped from 115 hp 86 kW to 135 hp 100 kW. The Corolla Alltrac sedan was sold in very small numbers, shared the same body as the AE92 sedan, with the only visible difference being the tire size. The GSi version was equipped with the 4AGE. Only the four-door sedan was imported. The 2-door coupe, 5-door wagon and the hatchback were not available in the showrooms. Because of the rising prices of gasoline, the 1.8-liter diesel version became an immediate success. The 2.0-liter diesel engine was not available until 1993 when the 7th generation was introduced, and it was the same time when Toyota started making cars in Pakistan.

Even after the introduction of the 7th generation of Corolla, reconditioned 6th generation models were imported from the Middle East. The Tazz was offered as 130, and 160i. While the three-door was sold as a panel van model there, called the Toyota Carri. You must have JavaScript enabled in your browser to utilize the functionality of this website. Robbie 5.0 out of 5 stars I highly recommend that once you install the coilovers and adjust the height adjust the collar beneath the spring as well. I slammed my corolla but didn't adjust the collar and it rode so bad.

In my scenario two studs from the front driver side broke off. Studs were torqued down by hand when it happened. Secondly same side kept making clanking and squeaking noise. Upon having the coilover inspected could not find the problem. Customer service in my case did not help much even after following his instructions and sending him videos of the problem. Overall for the price I paid they aren't bad, maybe I just got bad luck. Would I recommend these, maybe if you're in a budget. NOTE I only had an issue with the front driver side coilover the rest work fine. They appear to be very

good quality. This is a 1988 Toyota Corolla SR5. They won't issue my refund. To find your hidden ads To save and retrieve your favorite listings at any time. Worldwide, over 30 million Toyota Corolla cars have been sold. The reasons for this are it is claimed that the Corolla is the most reliable car ever to have been built, it is a very cheap car to

own and maintain, it is a very easy car to service by nonspecialist technicians and it has maintained its value on the used car market. The Toyota Corolla Verso is a reasonably sophisticated seven person people carrier. It has a high level of build quality, an extensive choice of engines, it is very spacious and comfortable and it drives very well too. It might seem a little dull, but it is a practical solution for the larger family on a budget. A used Toyota Corolla is still a good car, even though they have not been produced for the UK market since 2006.

You will still find many of them for sale across the UK from approved Toyota dealers, independent traders and private sellers. No matter where you are in the UK, we could find a deal on a used Toyota Corolla near you. The hottest Toyota Corolla production car is the T Sport Compressor. This was a limited edition and only 250 of them have been built, so you will be lucky to get your hands on one. It has a 2.0 litre supercharged petrol engine, which develops 215 bhp. The car is said to have excellent handling and sounds superb. Find your perfect deal on a used Toyota Corolla here at Motors.co.uk. Lenders may pay us a fee for these introductions. In the last twenty years it has been generally the first on the list of most reliable cars, along with Toyota Customs, Toyota Starlet, and today Toyota Avensis and Toyota Yaris. The Toyota Corolla has almost none of its weak points, because it is a far better quality car than its competitors and even more expensive cars such as Mercedes. Its only flaw is Japanese origin, if it can be flawed at all, because you will never be able to sell it easily like VW Golf II diesel. The maximum torque of the engine is reached at 4200 rpm and is 103 Nm. The torque curve is not very slight and the engine requires a minimum of 3500 rpm to tow properly. Over 5000 rpm it becomes noisy but still talkable in the car. The engine has one camshaft, and 12 valves, two intake and one exhaust per cylinder, and is definitely not a sports engine. Consumption of about 8,5 liters on average was more than acceptable, given more than solid performance. A liftback, a model with different light groups, and five doors were also imported, it was equipped with the specified more powerful 105hp engine, and the hatchback, a compact fivedoor version, was not even imported in the SFRY.

Buyers in the former Yugoslavia were offered neither the station wagon version Toyota Corolla combi as it was christened in Toyota, nor the sporty Toyota Corolla GTI. The 4x4 wagon and the 1.6liter 105hp unit offered a 327liter boot, but it could be swung down by the seats. The factory promised an average consumption of 8,6 liters, but the Corolla Tercel 1.6 XLi 4 x 4 consumed almost 10,0 liters on average. Excellent finish, has always been a trademark of Toyota. Automatic transmission versions, as pictured, have been a rarity in Europe. The engine is designed to last a long time but also to consume a little, since with an average consumption of 6,7 liters of unleaded gasoline it is more economical, especially considering the weight of the 975 kg Corolla. Although the engine is the most reliable in the class, it is noisy at higher rpm, but the insulation is not top notch. Take all this with reserve as we compare the Corolla to the best, the Golf III, Opel Astra, Honda Civic, Peugeot 306. It offers enough space in the back seat so it can satisfy a fourmember family without much difficulty. In terms of service intervals, they are at 15000 km. The cost of maintaining this car is in the ranking of the Golf III and Opel Astra, of course, if we compare the prices of the original spare parts. Some parts are more expensive, but some are cheaper. Corrosion is worth considering, though, since over 15s are still corrosive, but are much better protected than, say, a Opel Kadetta or Astra F. All those who maintained this car in authorized service had no problems up to at least 400000 miles. Admittedly cleaning is not the most exciting part of vehicle ownership. Many people would rather be doing something else than be outside washing and vacuuming their cars on a Saturday afternoon. That's exactly why your friendly neighbourhood car wash won't be going out of business for as long as people have better things to do. But whether or not you clean your car yourself, there's no denying that that removable car mats make it so much easier to quickly get rid

of most of the dirt your grubby feet drag into your car.
