Always dry the metal parts to prevent the formation of rust if the stroller has come into contact with water. Periodically check the condition of the wheels, and keep them clean of dust and sand. To avoid friction that may prevent the correct operation of the stroller, ensure that all the movable plastic parts placed along the metal frame are clean of dust, dirt or sand. Keep the stroller in a dry place. Prolonged exposure to direct sunlight may cause the fabric to fade. Hang to dry. DO NOT USE BLEACH. Always dry the metal

parts to prevent the formation of rust if the stroller has come into contact with water. If wheel squeaks, use a light oil e.g., WD40, 3in1, or sewing machine oil. It is important to get the oil in the axle and wheel assembly.http://vernalis.ru/upload_files/fda-guidance-for-industry-nutrition-labeling-manual.xml

Periodically check the stroller for loose screws, worn parts, torn material or stitching. Replace or repair the parts as needed. Use only Chicco replacement parts. If stroller becomes wet open canopies and allow the stroller to dry completely. Prolonged exposure to direct sunlight may cause the fabric to fade and plastic parts to warp. Hang to dry. DO NOT USE BLEACH. Always dry the metal parts to prevent the formation of rust if the stroller has come into contact with water. If wheel squeaks, use a light oil e.g., WD40, 3in1, or sewing machine oil. Periodically check the stroller for loose screws, worn parts, torn materials or stitching. Prolonged exposure to direct sunlight may cause the fabric to fade and plastic parts to warp. The cleaning and maintenance of the stroller must only be carried out by an adult. Always dry the metal parts to prevent the formation of rust if the stroller has come into contact with water. Periodically check the condition of the wheels, and keep them clean of dust and sand. Prolonged exposure to direct sunlight may cause the fabric to fade. The cleaning and maintenance of the stroller must only be carried out by an adult. Always dry the metal parts to prevent the formation of rust if the stroller has come into contact with water. Periodically check the condition of the wheels, and keep them clean of dust and sand. Prolonged exposure to direct sunlight may cause the fabric to fade. Please refer to the care labels for instructions on how to clean the fabric parts. Always dry the metal parts to prevent the formation of rust if the stroller has come into contact with water. Regularly check the condition of the wheels and, keep them clean of dust and sand. Keep the stroller in a dry place. Please refer to the care labels for instructions on how to clean the fabric parts. Always dry the metal parts to prevent the formation of rust if the stroller has come into contact with water.

Regularly check the condition of the wheels and keep them clean of dust and sand. If stroller becomes wet open canopy and allow the stroller to dry completely. Prolonged exposure to direct sunlight may cause the fabric to fade. The cleaning and maintenance of the stroller must only be carried out by an adult. Clean the fabric parts with a damp sponge and neutral detergent. Please refer to the products care label. Routinely wipe clean plastic parts with a soft damp cloth. Always dry the metal parts to prevent the formation of rust if the stroller has come into contact with water. Routinely check the condition of the wheels and all moving parts. Keep them free from dust, dirt or sand. To avoid friction, that may prevent the correct use of the stroller, ensure that all the movable plastic parts located along the metal frame are free from dust, dirt or sand. Keep the stroller in a dry place. Do not use abrasive, ammoniabased, bleachbased, or spirit type cleaners. Always dry the metal parts to prevent rust from forming. Avoid exposure to saltwater or seawater as this may cause rust to form. Brakes, wheels, and tires are subject to wear and should be replaced if necessary with parts supplied by the manufacturer. Lubricate only if necessary. Should the parts become stiff or difficult to operate, first ensure that dirt is not causing the problem. Then, lightly apply a siliconebased lubricant between the components. Do not overspray, as this may cause dirt to accumulate. Before cleaning, refer to the instructions on the care label. Avoid exposure to damp conditions. If the stroller does get damp, leave it fully opened in a warm environment. Dry off with a soft cloth. If you store the stroller when it is damp, mildew may form. The cleaning and maintenance of the caddy must only be carried out by an adult. Always dry the metal parts to prevent the formation of rust if the caddy has come into contact with water. If wheel squeaks, use a light oil e.g.

The editors will have a look at it as soon as possible. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. The stroller is also high quality and with a newborn in the car seat snapped into the stroller you feel like your baby is protected by a tank. However, the stroller is VERY heavy and large even when in the folded position. Takes up a lot of room in a standard trunk, so not good for trips with other baggage involved unless you have a large vehicle. As soon as she could hold her head up on her own we had her in an umbrella stroller. Not a huge deal though I dont think there would have been a lot of savings from the price difference and luckily we have room in our apartment for the stroller. Something to consider if you are very short on space or have a small car. Reviewed in the United States on November 11, 2013 It is hard determining what will work for your family when you are a firsttime mom.

There are so many products available. After having it for nearly six months, I wish I wouldnt have spent the money on this because you only use it for such a short period of time. We really cant carry the car seat any longer because it is just too heavy and already ordered a convertible car seat to replace this, even though our son is only 18 lbs and we can technically use this up until he is 30 lbs. It was only convenient for a couple of months. I am also not impressed with the quality of the fabric on the stroller. Unless you have the car seat in the stroller, the shade cover is not good. Also, one of the straps appears to be tighter than the other. Lastly, the storage space in the stroller is not that impressive. Please try again later. Weve used it both with and without the base and its been reasonably lightweight and easy to install. The stroller is also high quality and with a newborn in the

car seat snapped into the stroller you feel like your baby is protected by a tank. Something to consider if you are very short on space or have a small car. Please try again later. Please try again later. ILuvGoldDogs 5.0 out of 5 stars Of course now that I've examined it it is hard not to compare it everything else I have seen. Pros It is absolutely beautiful. The materials are very high quality all around and it shows. The colors are pleasant neutral earth tones in fern green, tree bark brown with cream accents on a black and dove gray base. The padding is fabulous! It assembled in a matter of minutes from the box This system will grow with the child infant to 50 lbs It turns on a dime with one finger It is well balanced and sturdy The infant seat portions can be rocked back and forth like a rocking chair.

The parts fit together extremely well thus assuring ease of use The features make ease of use practically effortless Everything about it is smooth Excellent design and safety features It looks as if it will be easy to clean and maintain Cons They didn't make these 25 years ago. I am extremely happy with this purchase, as were the parents. Please try again later. Please try again later. ProudMom 5.0 out of 5 stars We used the car seat for about a year and the stroller for a little longer. Then the set went into storage. I pulled it out in 2012 when my sister in law was expecting her first baby. She used the set for about a year, then returned it to us when we found out we were expecting our second child. A quick run through the washing machine and this set still looks like its brand new. I bought a Graco Snugride 30 on clearance as a backup seat, but it doesn't seem nearly as nice as my four year old Chicco Keyfit 30. I would definitely buy this again. The stroller is a bit on the big side when folded, but it fit fine in the trunk of my Honda Civic with room to spare. The car seat and base are easy to install. Both the stroller and car seat are easy to use. Please try again later. Please try again later. Coamex 5.0 out of 5 stars You know that if Consumer Reports says this is the best, then it is, as CR will test every possible aspect of it, including the most important one SAFETY. That is what I care the most when dealing with my baby, so if they say this is the best overall travel system that includes a stroller and car seat, I agree. After using it for a month now, I can tell you that it is very user friendly, very well constructed and looks very safe I hope I never have to find out if it ACTUALLY is safe, that is why I trust CR. It comes with EVERYTHING you need to use the car seat and stroller individually or together. It will hold your baby up to 30 pounds, which should be anywhere around his or her first year of life, which is good.
