0 out of 5 stars I've used this for everything from hanging a row of pictures perfectly level to cutting wood on a straight line. I highly recommend this to anyone. And I would have given it four stars if it worked the way it's supposed to. I had a higher opinion of Craftsman brand, but I guess I should have expected this as the product is made in China. The one we use here for our little DIY projects has done exactly what it was supposed to do every time. For the price, it's an excellent value. Is it a professional contractor's tool? No, but then it doesn't carry that price tag either. It does work, but only indoors. You cannot see the laser in sunlight. I tried using it outside to do some landscaping at night since you cannot see the laser during the day. It was easy to identify how unlevel it was when pointing it at my fence. Use at your own risk. Now it's off by 6 inches on an 11 ft wall. I did not drop it, bump it or abuse it. I even took the batteries out when stored. Don't waste your money. You can unsubscribe at any time.
