

# Crosslink Wheels Remote Locking System Manual

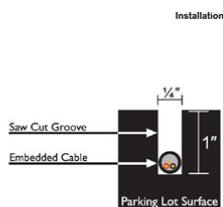

## Saw Cutting the Marked Area

The 14AWG locking antenna is installed in asphalt or concrete in a saw cut one inch (1") deep and one-quarter inch (1/4") wide. Saw cutting at this depth minimizes the chances of running into drain or power transmission lines already placed in the ground, as they are required to be buried at a much lower depth. Saw cuts can be done using either a wet or dry cut technique.

Dry saw cutting leaves no wet residue and is therefore easier to clean up. The downside to dry saw cutting is that it requires the proper equipment to capture the airborne dry asphalt particles. If you choose to dry cut, make sure that all technicians are equipped with proper breathing apparatus and protective gear.

Wet cutting does not require respiratory protection, but requires more work to clean up. Also, residue from wet cutting must NEVER be allowed to run into the storm drain or public streets. Most cities will levy a heavy fine for this infraction.

All saw-cuts on concrete should be in a cold seam, where possible.

## Removing Saw Cut Residue

After sawing, the cut needs to be cleaned out. If you have chosen to wet cut, clean out the saw cut and surrounding area using a wet-dry shop vacuum and a high-pressure water sprayer. In order to minimize staining, make sure to clean the areas before the saw cut residue dries.

If you have chosen to dry cut, clean the saw cut and surrounding area using the specified power sweeper. Any excess residues should be cleaned out using the Gatekeeper Hook, or if a Hook is not available, you may use a straight edge screwdriver.

Gatekeeper Hook for cleaning out the saw cut

Also, compared to the other similar systems like Autocop, Fort Knox, Cobra is it any different The thief has to bring a wielding machine to break a gear lock. Utype

these look bulky and are visible on top of gears when locked. Pintype these look chick and dosent mess with the leather which surrounds the gear lever

below. [http://amexeuro.com/an3\\_Uploads/epson-fx-1050-user-manual.xml](http://amexeuro.com/an3_Uploads/epson-fx-1050-user-manual.xml)

With Bill it is 2800 Rs 2100 without bill it has all those functions like child lock auto lock after 30 sec ignition cutoff touch sensor for the price it is amazing and the service is also good as mentioned by me earlier my mechanic did not know about the central locking s ignition cutoff and killed my battery in the process and scared me that all the wiring has gone bad. Got it fitted by TVS cochin before the delivery of the car. I had problems with it from the beginning. The interior lamp when left in the Door position wud turn on for the slightest bump i hit. Also, changing a CD on my cd player wud also cause the sensor to trigger. So disabled all things except remote locking for a few months. Then disliked that too. so no more remotes for me. I would like to get it serviced and brought back to normal. Also, I wud like to know more about the gear lock. How dos it work Can it be installed easily, how much wud the whole set up cost. Sorry too many questions. After around 3 years, it went totally bonkers and screwed up central locking as well. Now, my car is total manual. Ram bharose kinds. Amitoj It also comes with motion sensors for the interior of the car. Im also inclined to going out and checking some of the XENOS systems. Dont bother recommending anything costing over 67k Thanks !! It also comes with motion sensors for the interior of the car. Im also inclined to going out and checking some of the XENOS systems. Dont bother recommending anything costing over 67k Thanks !! Hey, Go for the Xenos system only. Dont even think of putting Autocop or Cobra. Xenos comes with a lifetime warranty and will also give you piece of mind. I think it costs approx 5.5k for their best model. Viper Thanks Viper and SLK, will go speak to one of the Xenos dealers tomorrow Im more than satisfied with it. Other cars, all have Autocops top models. Never had problems, except battery wear in one case. What type of key does the gear lock have a normal tumbler key or the dimpled key.

I Know our Chors are very smart in making a master key for normal locks. Waiting for suggestions. I actually didnt require any more security systems as it is parked normally in safer places like inside the house at night and in the office parking in the day. In both the cars the Remotes for the Central locking have been changed three times in the almost two years as all the remote buttons are normally getting bad after being used for every 6 months. I dont think its some fault from the Autocops manufacturing but its the higher usage ofcourse. But they do have a wonderful service to get these replaced every time. Yes as Zappo very correctly mentioned that the Central locking system is all gone when somebody makes the connection short by playing with wires below the left indicator near the battery, so a gear lock is more effective and useful. What type of key does the gear lock have a normal tumbler key or the dimpled key. I Know our Chors are very smart in making a master key for normal locks. Waiting for suggestions. This will be a better idea compared to playing with the buzzer. Return of petrol power!! Either they blow out loud or are silent. Those who claim that they know everything do not know what they dont know. This will mute the sound You might have received the use manual for remote. Try once the above method at least. Not sure if it can be done. I checked in a couple of car mod garages, and they advised me to change the entire central locking sstem itself!! If you can change that buzzer with a one with little less sound, if its possible, then that might fix the issue. I masked the buzzer and now it is not annoying. If so, two motors along with other parts and wiring will have to be added for the rear doors. There is no after market remote lock for the boot, to my knowledge. You can even cover the bonnet if it is not already done. Ask the Experts. Sorry! No matching results found. Try again. Error Identifying Your Location.

So i started approaching all the company like autocop, xenos, minda but still no one has clue. Then i spoke to crosslink wheels and told them its getting installed in banglore by your company area manager here told me to give some time he will get it confirm from banglore. After seeing my car they said we can fit.

They installed the lock with consultation from banglore technician on phone after 6 hours of work its working till now no issue. The slider eventually becomes loose and then slides by itself and then eventually breaks. The one I had also looked pretty rough and tough and despite being careful it does loosen up after some time. Hope this remote doesnt repeat the same story. BTW when I get back from vacation am gonna get one installed on my active, which, BTW doesnt have actuators in it. Ive spoken to a guy in pune and he said he will do it cuz the remote locking system comes with its own actuators. Am bored of waiting and discussing so am going to get it done, so that we can put an end to this discussion once and for all. When I enquired about the same in Pune dealership Pandit Auto, Tilak Road, the sales guy told me that If you fit the central locking you will loose the car warrenty. Please let me know.
