With no mode buttons to press, you simply plug it into the mains and connect the battery cables to start charging. It features automatic battery diagnosis to establish whether your battery can receive and retain a charge, and you can follow the whole charging process on the clear, easy to read LED display. CTEK chargers have a very low back current. A high current ripple heats up the battery which has an aging effect on the positive electrode. High voltage ripple could harm other equipment that is connected to the battery. CTEK battery chargers produce very clean voltage and current with low ripple. Depending on the product, the limited warranty period will vary. The limited warranty is not transferable. The warranty applies to manufacturing faults and material defects. The warranty is void if the product has been handled carelessly or repaired by anyone other than CTEK or its authorized representatives. CTEK makes no warranty other than this limited warranty and is not liable for any other costs other than those mentioned above, i.e. no consequential damages.

Moreover, CTEK is not obligated to any other warranty other than this warranty. YouTube Reviews 10,718. 12 Nov 2008. The MXS7000 now gives only 0,8 volts, the reading for a charger.
