That's a responsibility we take seriously, one that deserves the best effort we're capable of. The current exposure mode is displayed on the LCDs and viewfinder, and can be changed by pressing this button and rotating the main rear command dial. Available exposure modes are P Programmed Auto, S Shutter Priority, A Aperture Priority or M Manual. Also like all prolevel Nikons, the D3S doesn't offer any scene modes. Available apertures will vary with the lens in use. The currently selected flash sync speed can also be selected as the shutter speed in this setting. In the tables below, we've highlighted cells in yellow and text in blue for new options compared to a D3 with firmware version v2.00. Hidden and protected images will not be deleted.

The D3S is able to playback images from other Nikon DSLRs. Hidden pictures will not be displayed. These options stay set when you turn the camera off. The names can be changed if needed. Entering a new number creates a new folder. Dimensions depend on Image Area below. If you choose smaller than full frame format it will mask off the shooting area in the viewfinder. All presets can be further adjusted by the user, and the quick adjust function varies the cumulative strength of the other sliders. The C1 through C9 options only appear when created by the user through the Manage Picture Control menu item, and can be renamed. Note if Active DLighting is enabled, Contrast and Brightness settings are not available. Picture controls can be renamed, copied, and saved to or read from a flash card, allowing them to be shared between cameras. Up to 99 can be stored on a memory card at any one time. Only Slot 1 is supported. Shadows and highlights. See the manual for details. Note These options are variable depending on the b1 Custom setting for ISO sensitivity step value. Release mode option has been removed. Now uses current release mode dial setting. The new On series option lets you take a series of multiple exposures until Off is selected. Maximum clip length is five minutes for 1280 x 720 pixel clips, or twenty minutes for lower resolutions. This also applies to an external mic. The selection screen lists an estimation of the recording time currently available on each card. You can switch between them at any time and rename them. Allows pictures to be played back on High Definition TVs and monitors with the appropriate cable not supplied. Artist name can be up to 36 characters while Copyright can be 54 characters.
