- **dahle 842 manual, 1.0, dahle 842 manual.**

Once the shields are in place, you have the ability to cut cleanly through 200 sheets of paper at a time with very little effort. Dahle 842 stack cutter features adjustable paper guides and a selflocking backstop for increased accuracy during repetitive cuts. The clean, burr free cuts through large stacks of paper is made possible through the precision ground Solingen steel blade and a paper clamp that places even pressure across the entire cutting surface. The guillotine steel blade can be resharpened and replaced. Product Features. Safety shields can be found on either side of the cutting blade and will not allow the blade to move while they are in the up position. Cut Length 16 78 Cutting Capacity Up to 200 sheets of 20 lb. Safety shields can be found on either side of the cutting blade and will not allow the blade to move while they are in the up position. Cut Length 16 78 Cutting Capacity Up to 200 sheets of 20 lb. We Speak, Read and Write Spanish Fluently. This German engineered, industrial workhorse is equipped with a Solingen steel, highly honed blade for burr free cuts, and safety shield which prevents the blade from moving until its closed. Dahle Stack Cutters can be found in art departments, custom frame shops, and print and copy centers throughout the world. FEATURES This warranty applies to the original owner only. It does not cover damage caused by abuse, misuse, or unauthorized repair These industrial workhorses will give you the precision you need along with the safety you deserve. Each cutter has built in features that will increase the efficiency of your tasks as well as provide a safe and pleasurable cutting experience. Dahle Professional Stack Cutters are manually operated but make easy cutting of up to 700 sheets of paper at a time. Safety shields can be found on either side of the cutting blade and will not allow the blade to move while they are in the up

position. <http://www.flying-vikings.net/UserFiles/dacor-eagle-regulator-manual.xml>

Once the shields are in place, you have the ability to cut cleanly through 200, 500, or 700 sheets of paper with very little effort. This clean, burr free cut through such a large stack of paper is made possible through a ground Solingen Steel blade and a paper clamp that places even pressure across the entire cutting surface. Model 842 offers an adjustable paper guide and models 846 and 848 feature a spindle driven, selflocking backstop for extreme accuracy and convenience during repetitive cuts. These cutters can be mounted on any secure table surface although the optional floor stands are recommended for proper cutting height and leverage. Dahle Stack Cutters can be found in art departments, custom frame shops, and print and copy centers throughout the world. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Office Manager 5.0 out of 5 stars This is Not your typical curved blade tabletop cutter. This is a heavy duty office equipment. Once you set the clamp to secure the paper and close the safety cover, cutting a ream of paper requires very little effort. It cuts very straight.

The trick is to make sure to spend the time aligning the edges of your paper bundle before clamping it down. The mechanical operation was smooth and the clamp held its place. One of the most time saving and practical pieces of equipment weve bought so far. It is of high quality and sturdy construction. The blade is a Solingen Germany blade from the same renowned knife capital of Wusthoff and Henkels. The unit is very heavy so moving around is not recommended but it is very stable. Highly recommended, would purchase again. Buying the matching stand is highly recommended to get the most out this cutter. It is used by the marketing department in our company who provides material for a sales staff of over 150 people. It is made very well. Once the clamp is down, it holds the paper in place without moving and performs a precise cut every time. It is easy to put together and is very sturdy. We highly recommend this product! It is very safe! The two plastic covers must both close before the blade can move. So saying that it will slam down and crush your fingers is totally untrue. This comment seems to be from a competitor! It is a strong blade that stays sharp for a lot of cuts, but you do need to position the paper accurately. It is not difficult to do, but it does require some effort to calibrate your system so that it works well every time. This is because the clamping system does not allow you to clamp down on the paper past a certain pressure. This means you have no choice on how tight to clamp the paper. I own Dahles rolling trimmers and they are great. But these stack cutters are terrible. DANGEROUS clamp ready to crush your fingers, INACCURATE cuts, poorly designed backstop, and false claims of paper capacity. Just buy Triumph. This is because the clamping system does not allow you to clamp down on the paper past a certain pressure. This means you have no choice on how tight to clamp the paper. I own Dahles rolling trimmers and they are great.

Safety shields can be found on either side of the cutting blade and will not allow

the blade to move while they are in the up position. Once the shields are in place, you have the ability to cut cleanly through 200, 500 or 700 sheets of paper with very little effort. This clean, burr free cut through such a large stack of paper is made possible through a ground Solingen Steel blade and a paper clamp that places even pressure across the entire cutting surface. In a nutshell, this is one heavy duty cutter for quick and accurate separation of stacked, continuous computer printouts and for accurate sizing of large volumes of paper. These products include shredders, trimmers, sharpeners, laminators, binding machines, presentation products and other office accessories. Dahle's primary products are shredders and trimmers. The popular shredders are 30434, 20090PSe and 21015. These are popular among businesses and government organizations. Dahle uses solid cutting cylinders that are milled from German Solingen Steel in machines, and these are guaranteed to last a lifetime. Dahle shredders are mainly manufactured in Germany with some smaller domestic, small office and home office machines manufactured in China. The company aims to make quality products designed to meet the demands of an ever changing workplace. Dahle Shredder is accepted as the industry standard for quality and heavy duty construction while maintaining extremely competitive pricing. Dahle's winning combination of design and engineering excellence is further improved by an experienced sales, service and support team. Cutters and trimmers are used for cutting thick stacks of paper into various sizes.

<https://www.nelsonrigg.com/images/case-ih-shop-manual.pdf>

These machines cut plastic, mats, film, poster boards, mounting boards and more. A professional cutter or trimmer is a critical tool in finishing. Cutters cut a greater number of sheets of paper at a time while trimmers cut a smaller number of different types of stock. Dahle and Martin Yale are the major manufacturers of cutters and trimmers. Popular products are Dahle's 556 S Professional Large Format Rolling Trimmer, 558 S Professional Large Format Rolling Trimmer and 446 S Premium Mat Board Rolling Trimmer from, Martin Yale's W30 Wood Series Trimmer, 7000E PowerLine TableTop Commercial Cutter, 620RC PowerLine Commercial Cutter, 3800FC Series Forms Cutter, PL21 Powerline SemiAutomatic Ream Cutter and PL212 Powerline Electric and Ream Cutter. Specifications Table. I found Clary Business Machines on the Internet. I had some questions and Alex Molmud answered them and took care of my order. Once I made the purchase he told me I would get the machine the next Tuesday, which I did. The papercutter was all ready to go. I started cutting paper today, and have many more reams to go. At least I have a great cutter so that the people in my department won't whine about large paper for a while! Prices are subject to change based on your order and delivery locations and the applicable retail store. Please wait. added to cart Continue shopping 5 or. Designed for precision, it features a machine ground blade for smooth trimming, built-in safety features, and a precision alignment guide for accuracy. Designed for precision, it features a machine ground blade for smooth trimming, built-in safety features, and a precision alignment guide for accuracy. GROUND BLADE The machine-ground Solingen steel blade is honed to produce smooth, burr-free cuts. The blade slices across the paper so there's no compression marks or fanning. The blade is locked in the up position until both the clamp and the shield are down. Likewise, you can't raise the shield until the blade is raised.
