To calculate the overall star rating and percentage breakdown by star, we do not use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyses reviews to verify trustworthiness. I went by the cool look of it, but was not aware how incredibly loud it was going to be. Not to mention the fact that it does not come with instructions. You have to contact Jazwares or go to their website to find a user guide. I was not able to find the Stars Wars Darth Vader alarm clock user guide. There was one for WWE which was not the same. I contacted Jazwares and have not heard regarding the PDF instructions several people talked about. As soon as I can get the directions to set the clock I will change the review to 3 stars. In the meantime it will stay at 2. This clock is crazy expensive for it to not have instructions. I thought it was awesome and would be a great addition to my Star Wars collection. I was disappointed when opening the package. The actual products packaging what the clock comes packaged in in the stores, etc. was ripped and damaged. It was also not the same packaging as shown; it was more of a black and red color scheme. Upon opening the already torn packaging, I discovered Vader to have a few cosmetic flaws. First, it was covered in dust. His cloak was dirty and there were other minor cosmetic flaws as well. I am not too nitpicky so I didnt bother sending back, but this in an issue that should be noted by Amazon. The clockradio works as advertised. Took only a few minutes after reading the simple manual to figure out how to set date, time and alarm. Minor reception issues when moving body parts over his head, but works fine when sitting isolated. All in all I was pleased; the unit works well and is a great showpiece sans the minor cosmetic issues.

The only complaint I have is that when you play the Darth Vader alarm, It is extremely loud. ear piercing actually and there is no way to turn it down to a more comfortable level. Wont be using it as the alarm because my son will probably end up with hearing loss at some point, but luckily you can set it to buzz or radio which fortunately can be adjusted at the volume. Definitely a cool clock

though. Stands close to a foot tall. Light saber lights too. Create one here. Reset it here. The clock requires 2 AAA batteries, which are included. The clock digitally displays time, date and seconds. It also has an alarm feature. Pushing down on his head will light up the screen and his body. Press again to turn off the light otherwise it will automatically shut off after 5 minutes. Bulb Botz offers additional Star Wars clocks, as well as many other popular children's brands. Después de limpiarlo bastante bien, porque da pena ver un objeto así en ese estado, vi que le faltaba el adaptador de red que les mande uno que tenía yo compatible por si le quieren dar uso a la figura y pase a realizar la reclamación para devolverlo. Lo he devuelto y me han hecho pagar el porte de la devolución, indicándome que me reembolsarían el porte, cosa que no han hecho todavía desde el 18/12/2014 y ya me han contestado dos veces que lo han ingresado pero no aparece nada. La empresa en cuestión Jouets En Folie, me está pareciendo bastante poco seria para lo bien que suele funcionar AMAZON y eso del porte me parece vergonzoso, con la excusa de que son franceses, cuando es tan fácil como el que ellos mismo le pidan la recogida a la empresa de transportes.

En resumen, el despertador es muy bonito pero por el precio que tiene un poco caro, me esperaba que por lo menos estuviera en buen estado y una mejor respuesta de la empresa que lo vende. He will have this a week before Christmas and I know he will be so excited and love it. It arrived well within the time given and was extremely well packaged in a sturdy cardboard box and the person packaging it had been thoughtful enough to put some screwed up brown paper around the clock to stop it moving around inside the box. I have a feeling that when it is time for my other grandsons Birthday, he too will be wanting a Star Wars clock so I will certainly be visiting this website again. Very satisfied. Please try again He has started to stay in his room until it goes off whereas he would usually come into our room as soon as he wakes too early I would definitely recommend. Sorry, we failed to record your vote. Please try again Good value for a child's toy. Slightly irritatingly the alarm time is permanently displayed on the front there's no option to get rid of it even when you switch alarm to off on the back. We want to encourage our son to sleep later in the morning not wake him up. All in all very happy once I got it out of the nuclear bunker worthy packaging. Sorry, we failed to record your vote. Please try again It would be great if the alarm was Darth Vader noise rather than a beep beep. But fun to look at and have by the bedside. Sorry, we failed to record your vote. Partly because he needs constant reminders to keep track

of time and I figure a Darth Vader Lego clock will definitely get his attention! There are also Lego watches but that probably best addressed in another post. Let's take a look closer look at the Lego clocks currently available. This means the clock figure cannot sit down or "walk" like other clocks in the minifigure range. This is commensurate with his regular minifigure design as well. The head cannot be turned around.

Getting more than one of these figures together is an absolute delight, though of course not "necessary" unless you want to keep track of two time zones at once. The clock has the option of setting the default to 12 or 24 hour time. Perhaps later versions of the clock will incorporate this feature. Check out the full range of Lego minifigure clocks. It is not small which is great. Loud enough to wake him up and it can take different poses and hold things." I was able to find one here on Amazon while all local stores had sold out. My son was so excited and has used it every school morning to wake himself up. He says he is giving me a few extra minutes to get ready in the morning. A good product to teach responsibility!" And I loved how you could move the legs and arms! Very unique! " Their standard block clocks are available in three styles a single stud, two studs and eight stud block. Amazon has a good selection, with most on discount both minifigure and block styles. Amazon also offers a good warranty on the Lego alarm clock range which can come in handy when you are dealing with electronics. Can anyone else help I can't find our instructions. Thanks. The battery powered LEGO alarm clock is also supplied with 2x AAA batteries. It wasn't until 1947 that they started producing plastic toys, with the first version of the now infamous interlocking bricks coming in 1949. They weren't quite the bricks that people are used to nowadays, being made from a different material and having a slightly different locking system. It was actually Christiansen's son Godtfred Kirk that saw the potential for the bricks to become a tool for creative play and in 1958, the modern brick design was born. From this date, despite variation in the design and purpose of individual pieces over the years, each remains compatible in some way with previous pieces. So you could have a LEGO set from 1958 and it would still be completely compatible with a modern set.

Since the 1960, thousands of sets have been released covering everything from Aliens to the Wild West. The only area that the company has never tackled directly is military themed sets, because Ole Kirk set a policy that they must never make war seem like child's play. The largest ever LEGO set to date is a scale model of the Taj Mahal, which was made out of 5922 pieces. Ole Kirk Christiansen came up with this phrase to encourage workers to always produce the highest quality toys possible. Nowadays, LEGO makes a vast range of toys for all ages, as well as teaching materials for children, which are distributed in over 130 countries. The company has approximately 10,000 employees and is the world's third largest manufacturer of play materials.
