Should I choose a petrol or diesel engine. Can I get money off a used car with a gap in the service history. Is buying an older hybrid a bad choice Defender, with 404PS. My 96 MB W124 will stand for 2 weeks before i return to work did i mention i finished last Friday heh heh, so before return id like to give the car a day on the battery charger 4A low setting.

Is it vital to disconnect the battery during charging or will the vehicle cope OK, im fairly sure the engine management ECU has to relearn following reconnection but i may well be totally wrong. The car is running so perfectly id rather not disconnect if possible. Whats the proper procedureIf you can get into it remove the caps and top up if required otherwise charge it.Wouldnt have thought two weeks would flatten it if not. I used to leave a car standing outside three months at a time and it never failed to start.No its about 8 months old Humph and a substantial Bosch jobbie, but my car only really gets used for work commuting now, so with lights, heaters, rear window heater, mirror heaters etc running it doesnt get a fair crack at being fully charged up, and id like to give it a gentle top up. It never fails to start first time going to regret that, but im a bit of a belt and braces sort i spose. And i do have a fully charged heavy duty capable of starting my pick up if needs be jump pack in the garage for such a situation, my morning starts are around the 4am mark. I was always under the impression that such a trickle charge was good for a battery but that may be a somewhat old fashioned view. BT its a good quality charger with 2 outputs.4amps and 11 amps so hopefully ok. Keep em coming chaps.I have not had any problems, and my car has a canbus system and more computers than are good for it. I am sure you have seen the big chargers used in car dealers. I havent seen those batteies disconnected.In the end I did nuffink and the car started on the button What does your MB handbbook say about using a chargerCmon Perro, since when does a bloke read an instruction book; The truth being i havent got the foggiest where it is.swmbo has tidied up so it could well be in the freezer.My cars not quait e as bad as that Navy but its got enough to be going on with, which is one of the many reasons i dont want to part with it.

<http://www.diamondsinthemaking.com/content/faa-terps-manual>

I said in an early post its fine to charge with battery connected but if the op is unsure what im saying removing the battery leads will do no harm will it. It can get confusing on here for some folk who are not to sure so there is no harm done removing the battery leads. So long as you know the radio code should that be those old types!!I agree AE, it most likely will start fine, but i wanted to give the

battery a proper slow charge like we used to do to bring it back up to condition. i still like doing things the old way. The 2 yr old battery has gone flat and once I have recharged it I was thinking of getting one of those solar powered trickle chargers that plug into the cig lighter rather than have a cable trailing out from the garage to the van. Does anyone have any experience of these Probably worth a separate thread And as you say, you dont want to have the ecu relearning, resetting the clock, the radio and the alarm system. Leave it connected. My 40 yearss old Davenset has four settings, the highest being 4amps and so I can reallly get a trickle charge on settings 1 or 2 on the chargers settings dial. Obviously, anything lower and it always needs charging. A bit of arithmetic is useful. If it is, say, an 80AH battery then at 12.4 volts it needs 20AH to bring it up to full charge or 56 hours with your charger on 4A. Sorry, I cannot help with the car safety aspect of your charger. I use a home made charger that gives 0.5, 1 and 2A and have never had a problem with vehicle electrics. I Always connect and disconnect with the charger switched off. Hope this helps We use smart chargers and dont disconnect batteries. They never go above 14.5V so there is no chance of damage to the electrical system. Old style chargers which sound like the OPs has are poorly regulated and basically a big mains transformer with some diodes, so can output 40V or more which doesnt do the electrical system any good at all.

<http://www.petrokood.com/images/9760-combine-manual.pdf>

You can buy cheap smart chargers from Aldi and Lidl and from what I have seen of them they are eithre a slightly reboxed CTEK or a very very good copy. Many thanks for all the input, i would have just plugged in but the fact my charger is likely to run at 40v is a step too far to risk. Some modern batteries are harmed by the old style chargers, battery technology has moved on a lot. Leave connector under the bumper and plug in when your not using the car for a while. Dont even have to lift the bonnet. Also does 2volt but Ive never seen a battery like that, anyone enlighten me as to potential use Take the Merc too. Soooooorrrrrryyyy !!!; Things only hang around for a few weeks at most there, dont they First time Ive had trouble with a link. Ive tried it from the post and separately from the Lidl site and it works for me. I know the Lidl site knows it is my computer because it adds my home store. Sorry. The link seems beyond me. Youll have to find Lidl yourself if you are interested enough! When i called the AA out to my CRV when the petrol flap wouldnt open. The AA man said if you do only small runs most of the time you will find the battery will flatten soon. He said the reason for this was when the car is switched of the onboard computer still uses the battery. He said you can do no wrong in getting one of them solar trickle chargers there cheap as chips and well worth it. Anybody any experience of using one of these. Also what do you reckon about what he said about the battery on CRV. Cheapest equivalent Id seen was something like 30. Unless it gets here extremely quickly the conditioning charge i want to give it will have to wait a couple of weeks. Much obliged for the needed advice all. To have redirected some of those funds to a trickle charger wont do at all. goodness me no. what a let down. ; Just to top disillusioned with bennet up, wed have used the pick up for such a romantic foray anyway.

<https://www.meslekpapent.com/images/9752-installation-manual.pdf>

On the pick up subject, to show how good i am to my lady im going to fit some sound deadening material at various points around the body to cut down on the road noise from the tyres. could have used that advice in my online column instead, but thats a freeby on me and a taster of good romantic on road advice to expect. Whose body may I ask Now you come to mention it, following the brussels and beans intake. ; I was also thinking of Teddys Note, and how his battery went belly up on him. In my owners handbook it says to disconnect the battery if the car isnt used for over 30 days WOW! I too have a big orange Abwhatever charger and Ive just dug out a Bradex BX60 thingy which I think would be ok, but Ill not take the chance and instead will get a new one from ALDI, so theyll be 2 battery chargers for Dusty Bin come the morn. These chargers will go to standby if power is lost e.g. during a power cut or if the supply is accidentally switched off. HTH Mine assumes anything under

10.5 volts or thereabouts means there is no battery so it is impossible to start recharging a badly flat battery. I had to apply 12v to the battery via a universal transformer and then clip on the proper battery charger. The starter turns over for the brief moment it takes to fire much quicker now. Maybe its that equalising thing that Navy mentioned earlier, whatever it is its a big improvement. im sold, and will treat my batteries to an occasional slow charge from now on. I dont, the doom merchants havent frightened me with their tales of potential disaster. In the past, there was a noticeable drain on the battery when unused for a week or two but it is now always fully charged. Charging only starts after selection of mode, not connection of leads. After power loss, returns to standby, doesnt remember last setting. Does float and pulse charging usual smart charger stuff. Only problem was it was a 77Ah battery I had to charge and I wasnt sure how flat it was, but hadnt been used in a number of months.

I knew itd be slow given the 0.8A output in 6V mode. Took 39 hours to get the green light. Whilst good for maintenance charging of 6V batteries, I think Ill keep my eyes peeled for an oldschool Davenset Junior or similar. If this new charger really is posh thats a first and probably last time ill ever qualify.; edit. thanks for the Lidl's tip ill let the lad know. This is a top quality bit of kit costing about 40 to 50. Its solidly made and will last a long time. Owner reviews include people who have ones over ten years old and still going strong. The instruction manual is initially confusing but you dont really need to worry about it. Its a bit costly and there are no doubt cheaper alternatives but I like quality and am prepared to pay for it. Just feeling the Optimate and seeing the quality of the leads, fittings and casing gives one the clear indication that this piece of kit was designed to last a long time. Ive got fed up with buying cheap things that last a year and a day. It always worked with no damage done. Why then would you consider disconnecting while charging from anothe source Honest Johns Good Garage Guide has thousands of reader recommended garages, plus howto guides and tips on servicing. Our Top 10 shortlists can help. I bought a CTEK battery charger and connected it. There is a setting called AGM. What is that, please. Also, do you recommend running. Im looking to buy one for my dad, who owns a BMW 1 Series and have heard that CTEK are the best Any help. What would you suggest Im looking for one as a backup during the current Covid19 lockdown where the use of cars is restricted. Our guide will save you money. By using our services, you agree to our use of cookies. For the best chance of winning, increase your maximum bid. Please check your email account for more details. You can contact the auctioneer on 01754 880880 for more information. We have thousands of new lots everyday, start a new search.

Please register now so you are approved to bid when auction starts. We have teamed up with world leading online auctioneer Bidspotter to bring you closer to buying direct from the MoD. Every month since 1997 we have operated a "sealedbid tender" selling all manner of equipment. The successful buyer is generally the person or company that has bid the highest, all you need to do is submit your best price. The only way you will miss out is if you have not bid high enough. So, if you really want it, put in a decent bid or if it's a punt then take a gamble but risk losing out! A sales order will be issued on Thursday 19th showing the total amount due. VAT is charged on all bids and lot charges. It is also advised that all catering items receive a deep clean before use. In entering into the Contract the Buyer acknowledges that it waives any claim for breach of any such representations which are not so confirmed. Cost including the cost of labour and materials used. Damages, charges and expenses incurred by the Seller as a result of the cancellation. All prices quoted are valid for 30 days only, after which time they may be altered by the Seller without giving notice to the Buyer. Unless otherwise expressly stated, goods are available subject to remaining previously unsold and prices exclude any applicable VAT which the Buyer shall pay in addition at the appropriate rate. In the latter case the Seller may deliver by such means as it thinks fit. Time for delivery shall not be of the essence unless previously agreed by the Seller in writing. The Goods may be delivered or the Services performed by the Seller in advance of the quoted date upon giving reasonable notice to the Buyer. If payment has been made within 7 days of the Seller notifying the Buyer that such goods are

ready for collection or delivery the Buyer shall be deemed to have failed to take delivery of the Goods and clause 6d shall apply.

Claims which must be made by the Buyer against the carrier in accordance with the carrier's conditions. Failure to collect the goods by the Buyer shall not limit any risk in the goods. Until that time the Buyer may use the Goods in the ordinary course of its business but shall not resell or otherwise dispose of them nor mix them with any other goods nor change them in any other way so that they become unidentifiable. Provided that if the Goods are sold notwithstanding this provision the Buyer shall account to the Seller for the proceeds of sale whether tangible or intangible, including insurance proceeds, and shall keep all such proceeds separate from any monies or property of the Buyer and third parties, and in the case of tangible proceeds, properly stored, protected and insured. If the Buyer fails to do so the Seller shall have the uncontested right to enter upon any premises of the Buyer or a third party where they are stored and repossess them. In this connection and without prejudice to the generality of the previous sentence, the Seller and the Buyer acknowledge and agree as follows If the Buyer does not notify the Seller accordingly the Seller shall have no liability for such defect or failure, and if it has not already done so the Buyer shall be bound to pay the price as if the Services have been performed in accordance with the Contract. The Seller may elect to carry out any rectification work either at the Buyer's premises or at some other location of its choice. Unless the context otherwise requires, any item or expression which is defined in or given a particular meaning by the provisions of Incoterms shall have the same meaning in these Conditions, but if there is any conflict between the provisions of Incoterms and these Conditions, the latter shall prevail. Where such Goods are to be sold direct to a Buyer outside the UK it is the responsibility of the Seller to apply for and obtain the Export Licence.

It is the responsibility of the UK Buyer who intends to export such Goods to obtain the Export Licence and to provide a copy to the Seller before Goods are released for delivery to port. The Buyer must provide to the Seller satisfactory proof of shipment within 14 days of removal otherwise the Buyer shall be liable for the outstanding amount of VAT. In addition when Goods are sold to a Buyer within the EC the Buyer must provide the Seller with the EC VAT registration number to avoid being charged. Failure of the Buyer to provide the Seller with the EC VAT registration number will result in VAT at the current rate being added to the Buyer's invoice and the Buyer shall be liable thereof The Seller has no authority to commit the MOD to any liability and nothing in the Conditions or in any other document forming part of the Contract shall give or be construed as giving the Buyer any rights against the MOD or any other party. We have teamed up with world leading online auctioneer Bidspotter to bring you closer to buying direct from the MoD. Failure of the Buyer to provide the Seller with the EC VAT registration number will result in VAT at the current rate being added to the Buyer's invoice and the Buyer shall be liable thereof The Seller has no authority to commit the MOD to any liability and nothing in the Conditions or in any other document forming part of the Contract shall give or be construed as giving the Buyer any rights against the MOD or any other party. Supplying 20 Volts, it can charge 10 X Accumulators at one time. Davenset Chargers are still made today. All the museum trustees can remember their parents taking an Accumulator to be recharged. Had a hard life so doesn't look very smart. Great to watch the mercury arc rectifier fire up. Also the original instructions though the varnish has gone off unfortunately, though still readable..

Jim Butterworth, Minehead, 25th of April 2014 Got one of these stored in roof of the garage, been in family from new, purchase cost in 1926 was then 21 guineas. Have the hand book also, don't think it would be working now not been used for years.. A.Madison, Doncaster, 22nd of November 2012 I have a charger just like this one My grand father owned a garage in the late 20s we had the garage in the family for 82 years And I know grand dad and Dad did use the charger up till the late 1970. Geoff Parker, Burton Hastings. England, 3rd of September 2012 My uncle who ran the local garage had one of these to charge car batteries for many years. When he retired it was thrown out in the

scrap heap and has rotted away I have the remains of it and wonder if anyone would like the parts, rectifier sockets, switches, plugs, rheostats etc. All in poor condition, never the less repairable, I think!. Ken McAllister, Malahide, Co.Dublin, Ireland., 9th of May 2010. Letchworth Garden City Westholm Green, Letchworth. See each listing for international postage options and costs. By using our services, you agree to our use of cookies. For the best chance of winning, increase your maximum bid. Please check your email account for more details. You can contact the auctioneer on 01392 425481 for more information. We have thousands of new lots everyday, start a new search. Please register now so you are approved to bid when auction starts. Customers are more than welcome to organise a courier of their choice for collection of goods.

Garage on right hand side on approach to the village. Details available on request. Should payment not be received for any lot by the stated payment deadline, the auctioneer reserves the right to withdraw from the sale of that lot. Potential buyers who do not inspect lots prior to bidding, do so at their own risk. Your bid is your commitment to purchase, not to view or negotiate after the sale. No warranty is offered or implied. Each lot is bought and sold as seen unless otherwise stated. Viewing is welcome and recommended. BUYERS PREMIUM Each lot will be subject to a 15% Buyers Premium plus VAT INSTRUCTIONS FOR BIDDING Full details including valid email address and phone number must be provided in order to receive approval for bidding. Husseys will retain all bidder details on our mailing list and may use these details for future sale notifications. In the event of a bid being received within 10 minutes of the scheduled closing time, the bidding period on that lot will automatically extend by a further 10 minutes and for a further 10 minutes for any bid received thereafter. If more than one maximum bid is placed of the same amount, the maximum bid placed first will be considered the highest bid and a further bid will need to be placed to take the lead. Bidders are notified by an automated message which appears on their screen. IMPORTANT PLEASE NOTE Your Highest Bid will be treated as a valid bid even if at the time of placing it the RESERVE is NOT MET. Vendors regularly ask us to reduce the reserves in the closing hours and put items on sale. Remember when placing a bid you are bidding to buy. PAYMENT TERMS Cleared payment in full to be received by 12 Noon Thursday 22nd October. Details available on request. Should payment not be received for any lot by the stated payment deadline, the auctioneer reserves the right to withdraw from the sale of that lot. LOT REMOVAL All lots must be paid for in full by way of cleared funds prior to collection.

A receipted invoice will be required as proof of purchase upon collection of any lot. It is the purchaser's responsibility to remove all lots from site. We may be able to provide lifting equipment for use during the collection period; please make arrangement with the auctioneers in advance of collection. All items must be removed by Tuesday 27th October unless alternative arrangements have been made with the auctioneers. Buyers are reminded that all lots stand on site at their own risk from the moment of sale. The Auctioneers undertake that care has been taken to see that the catalogue descriptions and advertisements are accurate and reliable, but these are necessarily statements of opinion and must not be relied upon as statements of fact. All prospective bidders are strongly advised to view lots prior to bidding. The hour and odometer readings on machinery and vehicles in this sale cannot be warranted and should not be relied upon unless otherwise stated. KEYS Keys not supplied with lots unless otherwise stated. VAT The Buyer shall pay any VAT, which may be due on any amounts owed by the Buyer under the Conditions of Business at the rates prevailing on the day of the auction. Exports Buyers must inform the Auctioneers, in writing, of their intention to export purchased items at the time of payment. The VAT on this fee will not be refunded.

Refunds will be made in GBP and the Auctioneers will not be liable for any currency fluctuations which may occur. NonEC Purchasers VAT will be charged at the UK prevailing rate. Upon receipt of a copy of the bill of lading as proof of export, the VAT will be refunded on the hammer price. VAT will not be refunded unless proof of export is provided within 3 months from the date of the sale. VAT will not be refunded on the buyer's premium. Companies Registered in an EC Member State VAT will be charged at the UK prevailing rate.

The Auctioneers will also require the customer's VAT number shown on company headed paper in order to zero rate the supply. By making a bid for any lot, the person making the bid warrants that he has read, makes his bid upon and agrees to be bound by these Conditions, and further warrants that he has due authority and capacity to make the bid and binds both himself and any employer or principal to honour any contract resulting therefrom. Any bid shall be deemed to be an offer by the buyer a term used herein as including the bidder and any principal or employer of the bidder to purchase any lot tendered upon these Conditions alone. 2. The Auctioneer tenders any lot for sale as agent for and on behalf of the person from or through whom instructions for sale have been received the Seller and not on the Auctioneers own behalf. The sale of any lot shall be concluded and binding at the moment when the lot is knocked down. The total sale price, less any such sum, must be paid to the Auctioneer at his office or elsewhere as he may direct. Payment in full shall be deemed not to have occurred until any negotiable instrument has been honoured in full or cash has been paid such payment to be made within the time specified in the sale notes or in default of specification by 5 oclock p.m. on the day of the auction or on the next complete working day excluding Saturdays. Time of payment shall be of the essence. The buyer shall not be entitled to remove any lot from its position at the time of sale until the purchase price of that and any other lot purchased at the auction has been paid in full and in default of payment as aforesaid the Auctioneer shall have a lien upon all lots purchased by the buyer during the same auction and shall be entitled to rescind the sale in respect of any lot or lots for which full payment is not made in due time, forfeit any deposit paid in respect of them and resell the same without any right of compensation in the buyer.
