Depending on where you use the device, you can power it either with the included AC adapter or six D batteries. Unfortunately, the satellite antenna isnt as easy to position as a traditional FM antenna. Youll first need to find a window with southern exposure. From there you have two options. You can place the device near the window, with the 22.5foot antenna cable coiled and stored in a compartment on the receivers bottom; alternately, you can position the unit nearby, uncoil the cable, and place the antenna module at the southernexposed window. But as long as your intended listening spot has a clear view of the southern sky or is within range of XMs network of terrestrial repeaters found primarily in urban areas, your reception should be fine. <http://www.pszczelimiod.pl/uppics/bosch-nexxt-500-plus-series-manual.xml>

At its top volume, this unit would be drowned out by even a mediumsize party. But our biggest gripe was the boomboxes lack of options. Unlike traditional boomboxes, this unit cant play music from any source besides satellite. Nevertheless, its hard to recommend the SkyFi Boombox to anyone but diehard XM fans. Delphis improved CD Audio System is a step in the right direction, but we look forward to seeing the satellite radio boombox refined further. Lets round up some of its best. Just insert your SKYFi XM Satellite Radio receiver sold separately into the integrated front dock to enjoy over 100 digital channels of music, news, sports and more coast to coast. The sleek modern design features 2 dualcone speakers for maximum bass, a carry handle for easy portability and a headphone jack. Must be used with SKYFi XM Satellite Radio receiver. Just insert the Delphi XM SKYFi radio receiver model SA10000 into the Boombox dock, and youre ready to go. The SKYFi radio receiver inserts neatly into the SKYFi Boombox for satellite radio wherever you want to take it. Note that the SKYFi radio receiver is available separately and requires a monthly subscription. The convenient, portable SKYFi Boombox offers great sound with dualcone stereo speakers also referred to as fullrange speakers, featuring a great range of lows and

highs. <http://glossy.ru/userfiles/bosch-nexxt-500-plus-manual.xml>

The SKYFi Boombox is powered by a 12volt AC adapter included or six D batteries. Youll get a clear XM reception with the included highgain antenna, which transmits the radio signal to a highly focused area. The 20foot cable can be easily positioned for optimal reception, from sitting on a tabletop to mounting on a wall. It is recommended that the antenna be positioned near a southfacing window or outdoors with a clear view of the southeastern sky in order to receive the satellite signal. In some cases, it will be possible to receive XMs signal through standard home walls or a roof. When youre on the go with the SKYFi Boombox, the antenna attaches conveniently to the back of the Boombox. Other features include Headphone minijack Integrated carrying handle Volume control treble and bass settings controlled by XM SKYFi radio receiver What Is XM Satellite Radio. XM Satellite Radio was the first satellite radio service to be offered in the U.S. It features a stateoftheart broadcast center in Washington, D.C., two Boeing 702 satellites providing 18 kW of powerthe most powerful commercial satellites ever built, and approximately 800 terrestrial repeaters located throughout the continental United States for seamless transmission. Service is not available in Hawaii or Alaska. XM Satellite Radio offers 101 channels, including 70 music channels, over 35 of which are commercialfree, and 31 news, sports, talk, and childrens channels, broadcast coast to coast in digital quality. 0 out of 5 stars Its hard to find Sirius XM players that you can use at home that dont use smart phones I dont know how to work that stuff!, and also one that fits my SkyFi receiver. Ive had two of these same units on which the volume control went bad. I was thrilled to find this one on Amazon, because its the same as what I had previously, fits my space, fits my SkyFi receiver, and a reasonable price. I hope the volume control continues to work for many years. Even if the manual knob conks out, the remote control should operate it. This boombox for XM I have with my SkyFi receiver. It also can use D Cell Batteries to take out and about. The signal is so strong from XM that I have the antenna right on my table about 10 feet from the window. The sound quality is that of CD. And with the upcoming MLB baseball season, you can take this anywhere and hear your team play as XM will play each and every game from spring training up to the world series. Keep in mind you need an XM receiver to make this work. I have the Delphi SA5000. You wont be disappointed, nor will the person you buy this for as a gift. One of the Top American car makers has a contract to put XM in their automobiliiles, and XM stock is rising. So that should tell you something about the popularity of XM radio! I missed having my music outside, I did have direct TV, and had out door speaker for it. I have cut back on cost and got rid of my Direct TV. I bought a used one, It works wonderful and I am enjoying my XM again. Thank you Amazon for such great service in finding me a Delphi SA1001 Boombox and at a great price. It sounds like a cheap radio because thats what it is. The speakers are cheap. The casing is cheaply made and my unit did not work with batteries as promised. The design is great, but the sound quality is very poor. If youre thinking about getting one because you ALREADY have a Delphi XM Radio receiver, then its not a bad investment.

Press and hold memory key to recall information. 7 Section 3 Basic Operations Turning SKYFi on and off Press power on the SKYFi Receiver or SKYFi Remote Control. When first turned on, the receiver will automatically tune in to the last channel listened to and recall the previous settings. Please turn off SKYFi and wait for the screen to go blank before removing it from the home stand or car cradle. This will ensure that all of the current settings are saved. Basic channel selection Basic channel selection SKYFi allows you to select a channel by directly entering its number, using a preset key, or by tuning up or down to reach the channel. Select a channel by number 1. Verify that SKYFi is in DIRECT entry mode.

DIRECT should appear in the upper right corner of the display. They are organized into two different groups, or memory banks, Preset A and Preset B, each with 10 channels corresponding to the 10 number keys. Setting channel presets 1. Tune in the channel you want to register as a preset. 2. Select either Preset A or Preset B by pressing until an A or B appears in the upper right corner of the display. 3. Press and hold the number key corresponding to the preset you would like to set. The channel name and number will highlight and the audio will mute for 2 seconds to indicate that the preset is registered. Press the number key corresponding to the desired preset. Tune to a channel Tune up and down the channel list using the SKYFi scroll wheel or the plus and minus buttons on the remote. When SKYFi is connected to the SKYFi Audio System, the plus and minus buttons control the volume, and other channel selection methods should be used. If you do not select a channel, the display will time out and return to the channel you are listening to. Select a channel by category Press either of the left and right category keys to enter category search. 1. Continue pressing one of the left or right category keys until a category you are interested in appears. 2. Use the SKYFi scroll wheel or the remote up and down keys to highlight a channel within the given category. 3. Press enter to select a channel. 4. If you do not select a channel, category search will time out after several seconds. Preview favorite channels You can use the preset keys and category search to preview the artists and songs currently playing on your favorite channels before deciding whether or not to select any of them. 1. Set your favorite XM channels as presets, as explained in Setting channel presets on page 8. Your SKYFi will automatically create new categories, called Preset A and Preset B, when presets are set in either bank. 2.

Press the left and right category keys to enter category search, and continue pressing it until either Preset A or Preset B appears on the display. 3. Press display to display the channel name, artist name, or song title for each preset. 4. Your SKYFi Receiver will remember if you were in the preset section of category search so that the next time you press a left or right category key it will immediately display the information on those preset channels. 10 Section 3 Enlarging display text Your SKYFi display can be reconfigured to be more readable from across a room in the home or office. 1. Press display while on a normal play screen to switch to a largertext channelnumber configuration. 2. Press display a second time to continuously scroll the artist and song title information across the display in large text. 3. Press display again to return to the default display.

Save and recall artist name and song title You can save the artist name and song title on the current channel for future reference. 1. Press and release the memory button to save the current screen information. Here, you can change each of the following options using the scroll wheel on the receiver or the up and down keys and on the remote control. While in the menu section, the menu button acts as a back button, allowing you to back out of existing sections. Following are the settings that can be changed Brightness and Contrast This control allows you to adjust the brightness and contrast of your display. You may find you need to use this when you switch between in-car and indoor use. Memory Recall This is an alternative way of entering memory recall mode. It functions the same as pressing and holding the memory button. Channel Skip and Add You can skip channels in your SKYFi channel list to prevent them from being accessible with the SKYFi scroll wheel or the remote plus and minus or up and down keys. Deleted channels can still be accessed by DIRECT entry or by using a preset key.

They can also be added back to the list later. To completely lock SKYFi from receiving a channel, call XM Customer Care at 18008529696. Most users will NOT need to change this level from the factory setting. This is not a volume control. You should set the volume using the audio system connected to your SKYFi Receiver. 12 Section 4 Auto Shutdown You can set your radio to automatically shut off 60, 120, or 180 minutes after it is turned on. Antenna Aiming You can optimize the position of your home antenna, as described in the SKYFi Installation Guide, using this screen. Press menu to return to the main play screen. Factory Default Selecting this option restores all of the settings to their original factory setting. This is useful if you alter a number of settings, then change your mind but don't know how to eliminate the changes you made. Remember, restoring the factory settings will erase all of the presets. You will have to reset them if you restore the factory default settings. 13 Section 5 Reference Taking care of your SKYFi Failure to follow these instructions may result in personal injury or damage to your SKYFi Receiver or to your vehicle. Use only a soft, dry cloth to clean the outside of your SKYFi and any peripherals. Do not use any solvents, chemicals, or cleaning solutions containing alcohol, ammonia, or abrasives. Do not allow liquids to spill on the unit. Do not use sprays near your SKYFi. It is best to keep SKYFi out of direct sunlight or other sources of extreme heat. Avoid placing SKYFi in a setting where air cannot circulate around the unit. Replacing SKYFi Remote Control batteries Your SKYFi Remote Control uses a 3V CR2032 Lithium battery, available at most retailers that carry electronic products. To replace battery, slide the battery door off the back of your remote control, press down on the battery, and slide it out. Replace battery with positive end facing the battery door.

Check the adaptor fuse by unscrewing the ribbed end of the adaptor and examining it. If required, replace with a 1amp fuse only. If you see NO SIGNAL on the display Cause The XM signal is out of range. If you are using SKYFi at home, reposition the antenna. If you are using SKYFi in your car, the message should disappear as soon as you move out of an obstructed area such as an indoor garage. If the problem persists, make sure your antenna is mounted outside and on top of your car with a clear view of the sky. If you see ANTENNA on the display Make sure antenna is correctly attached to the SKYFi Home Stand or SKYFi Car Cradle and that antenna cable is undamaged and free from kinks. Turn the SKYFi Receiver off and back on to reset this message. If you see OFF AIR on the display Cause The channel selected is not currently broadcasting. Tune in to another channel. 16 Section 5 If you can only receive XM channels 0 and 1 Cause Your SKYFi Receiver is not activated. If no song title or artist name displays Nothing is wrong with your receiver. This is normal on many talk and news channels where there is no song playing. Also, this information may not yet be in the database for some music channels.
