Its a fullfeatured vocal processor with a mic preamp, 16 mic models, multiple vocal character selections, a fullfunction compressor, and 3band EQ. It can also be used as a multieffects processor for voices or instruments with chorus, flanger, phaser, vibrato, pitch shift, detune, Whammy, delay, and reverb. It has a USB audio interface for streaming your tone to the computer, stereo line level inputs and outputs for recording instruments, balanced XLR outputs. Included Cakewalk custom software give you a complete repertoire of recording capabilities. You can even reprocess dry recorded tracks back through its modeling and effects. Includes power supply and custom Cakewalk recording software. All Rights Reserved. Publisher does not accept liability for incorrect spelling, printing errors including prices, incorrect manufacturers specifications or changes, or grammatical inaccuracies in any product included in the Musicians Friend catalog or website. Prices subject to change without notice. Subscribe to our free newsletter Request a new review It comes with 40 factory and 40 user presets. The user and the factory effects start out the same but the user effects can be tweaked and pretty much completely changed into a different effect, whereas the factory presets can not be changed. As long as Ive had this pedal I havent wanted to change any of the user effects so I dont know how user friendly that proess is for this particular pedal. I have used other DigiTeh multieffects processers though, and they were very easy to make your own preset effects. The Vx400 doubles as a recording interface and comes with pro tracks recording software.<http://cribpointonline.org/cribpointonline/userimages/c2230-user-manual.xml>

This is a really awesome feature because you can start recording with just the push of the two left footswitches. Another awesome feature about the Vx400 is the expression pedal. The expression pedal is used differently for different effects, such as add more or less volume, change pitch and add more or less of an effect. UTILIZATION It is very easy to get started using the Vx400. You just power it up with the included power adapter and plug in a microphone and a speaker output and youre set. If you want to use the included recording software it takes a little more time. Everything you need is included on the disc and once you get all of the software installed you can hook up the Vx400 to your computer via the included USB cable. SOUND QUALITY The effects the Vx400 has are amazing. My favorite effect to use on this pedal is the pitch change. With the expression pedal in the heel position, you can get a low, bassy, monstrous tone, and then change to an extremely high pitched wine, in the toe position. OVERALL OPINION I have had this pedal for about 2 years and it has done exactly what I bought it for, which was voice changing effects. As far as durability goes this pedal is not anything to brag about. After a while something happened on the inside of mine and I think some springs popped loose or something. I havent really needed to use it in a few months so I havent tried to fix it or tried to see if I could get a warranty repair. All around it has been a great pedal though and I would definitely recommend it to anyone who needs a voice effects pedal. 1 people did not find this review helpful Did you find this review helpful yes no. Well for small scnes but not enough for the rest of my pro got.s Hard to avoid the Feedback in any direction, even with a good ing sound,

without pushing back the noise gate, which is a shame because the quality of the effects is  
altre. <https://www.daeindustriesinc.com/usercontent/file/c2255-treadmill-manual.xml>

Besides it has a trs good pdalier strong enough in 3 years and more than 100 concerts took quite a  
beating, not to mention the beer spilled., the trick as well as you can layer multiple effects to only  
one CREER attention, however, do not overdo it if its live fte of feedback. UTILIZATION Trs simple  
programming, just a pity that both the effect we can not save the change of place unless it hurts to  
look. Perfect for live, trs so enjoyable to be able to grate same effect and change whenever you want.  
SOUND QUALITY Small snag on the effect of distortion that is not aggressive enough I got. You can  
of course make it more aggressive, but live has a feedback from all over the place. Ditto for the  
reverbs, use with modration. Cel says the studio is perfect. OVERALL OPINION Trs qualitprix good  
value, but a little lightweight if you want to go pro. Did you find this review helpful yes no. The price  
250 euros on thomann. Cheap my son. Did you find this review helpful yes no. UTILIZATION  
Configuration trs simple you just need to install management software input and output audio usb to  
take advantage of the gnrosit Connectik. The edition is a breeze, with particulirement software  
provided one has all the effects at hand, we may modulate the paramtres live; ACCS was all the  
programs of Vx 400 kon leisure may change, and especially we can save Thousands of presets on the  
computer and load them into the Vx in time since there kil ke 40 user memory. SOUND QUALITY  
The PDAL is trs beautiful, apparently solid; the effects are of excellent invoice was under the main  
effects kon had never seen before see the list, and the surprise is for use with a low for me  
absolutely for gnial ki the research sounds crazy, there is no time latency, and by combining these  
two effects more abroad a delay or. or. and setting them on a sound electro crazy, sound tek ki  
dchire nothing kpour bass. Also suited to many instruments and invironment.

USE Really easy, just look at the manual, intended Somehow unnecessary. SOUND QUALITY  
Brilliant, you can not expect more for the price. Its superb. There Are Probably other MultiFX  
processor That give you better sound but really much more expensive and They Are Probably not so  
flexible. NOTICE GLOBAL Absolutely wonderful piece of hardware. I take it everywhere. For if c ds  
lexicon for the semi pro c nikel frankly with essay plugin lexicon I can tell you that I quickly returned  
to my koi vocal400 as it sounds better in the hardware reverbs 1 people found this review helpful

The VoiceLive 2 floorbased vocal processor from TC Helicon makes it easier to lead your own vocal backup group while sounding rich and authentically human at the same time. It starts with a guitar. MIDI keyboard, or auxinput controlled vocal harmony algorithm with four intervals, each of which can be unisondoubled, or 8 discrete voices controlled. And when you want to tap into your gospel soul, VoiceLive 2 effects pedal gives singers a Choir algorithm that creates the massive multivoice group vocal sound to bring home those classic choruses. Vocal effects pedal with more automatic features When youre worrying about parameter settings.

You spend less time focusing on your music. So when TC Helicon set out to build VoiceLive 2, they automated several of its features. Auto Mic—Gain Set the mic gain from a standing position just by singing. Once this is done there are no knobs to be jostled in transit and you can still do manual tweaks if you feel youd like to. Auto Gate—Feedback a problem. An allnew Auto Gate listens to you and adjusts to reduce feedback and effects leakthrough while youre not singing. Adaptive Tone—A single push of the Tone button engages studioquality Shape EQ. Compression, and deessing that adapts to the tonal range of your singing style and voice for increased impact and smoothed dynamics. Finally, your live singing can have that studio polish. Reverb and Delay—ducking Increase the sustaining tail of your reverb and delay effects while carving ou Tested in working condition. It can take anywhere from 10 days to 60 days. In some extreme cases. Over 60 days! Import duties. Taxes, and charges are not included in the item price or shipping cost. The first ever combination of complete vocal and guitar processing. VoiceLive Play GTX takes everything that gives to singers and adds awardwinning TC Electronic guitar. Artist presets offer signature vocal and guitar sounds while full editing ability allows you to define your unique style. No amp required, Key for harmonies and pitch correction set automatically from guitar input, Plug in your MP3 player to the AUX input and sing along using Vocal Cancel feature, Producers spend more time on perfecting vocals than any other instrument. And the number of layered vocal tracks on a studio recording often run well into the doubledigits. Now the same care for creating vocals live or at home is available to everyone. VoiceLive Play GTX gives singers the opportunity to experience the sound they know and love from their favorite songs with ease. Featuring automatic backing harmonies.
