The time for a full charge depends on the capacity of the powerbank, the remaining power in the powerbank and the power supply. Please consult the quick manual for the estimated charging time for the first use. If your device is actively in use during the charging process, the charging performance may be elongated. We advise to always check in person with the airline, by either calling or chatting, before travelling for more information. How long does it take to charge the powerbank If the portable battery has 5W or 1A output, it can charge smartphones but not tablets except for iPad mini. <http://decorinter.ru/img/uploaded/cablevision-manual-control-remoto.xml>

The bigger the capacity of the battery, the more likely it can charge your smartphone fully, or even multiple times. In general, when all the indicators turn off, it means that the battery is fully recharged. For further details, about the indicators, please refer to the quick manual. What can I do Then just let it charge for at least 8 hours. Please charge your powerbank. The indicator will start blinking when the powerbank receives sufficient power. This is sometimes due to faulty cable issue. We recommend using the cable and connector meant for the powerbank. While some tablets can accept lower input 1A or 1.5A, the charging is slower and sometimes can only be charged when the tablet is in sleep mode. Some tablets cables might not be compatible with a powerbank due to different cable chipset design. For Samsung Galaxy Tab in particular, we recommend using the cable and connector meant for the powerbank. If the powerbank cant charge the device, make sure the powerbank is fully recharged. You can try to use another cable to charge your device. You should contact the support team via the ask a question section. Please check the original battery capacity of your device and the capacity of the powerbank. Is this normal They may get even warmer if you use your device while charging.
