Fixing dimensions The OptiV is supplied in an assembled state. This model is designed to be permanently fixed. Please see Fig.2a and 2b for recommended fixing dimensions. Important Safety Advice When using electrical appliances, basic precautions should be followed to reduce the risk of fire, electric shock, and injury to persons, including the following If the appliance is damaged, check immediately with the supplier before installation and operation. Do not use this appliance in the immediate surroundings of a bath, shower or swimming pool. Means for disconnection must be incorporated in the fixed wiring in accordance with the wiring regulations. Do not use outdoors. In the event of a fault switch off the appliance. Switch off the appliance when not required for long periods. If the supply cord is damaged, it must be replaced by a special cord or assembly available from the manufacturer or its service agent. Warning No naked flame sources, such as candles, should be placed on this apparatus. Warning The appliance shall not be exposed to dripping or splashing and that no objects filled with liquid, such as vases, shall be placed on the apparatus.

Warning this appliance is of Class I construction and must be connected to a mains outlet with protective earthing connection. Electrical WARNING THIS APPLIANCE MUST BE EARTHED Do not switch the appliance on until properly installed. Please read all the safety warnings and operating instructions. General Unpack the appliance carefully and retain the packaging for possible further use, in the event of moving or returning the appliance to the supplier. Contents of Carton OptiV Fire Model PGF10 Remote control and batteries AAA type Product Features Volume Control Remote or Manual operation Red light indication of standby mode Installation Warning. Do not connect the appliance until properly fixed to a secure base and the instruction leaflet is read fully. At installation of the appliance, care must be taken not to damage any cables that may be concealed in the wall. Positioning the Fire The OptiV uses an illusory reflection technique and is designed to work best when ambient light levels are low. If the OptiV is installed in brightly lit areas, the strong reflections may diminish the flame picture. Height of Fire There is a choice of height when fitting the fire. An OptiV screen will appear for about 3 seconds before the flame picture starts. Note The user may notice a blank screen for approximately 5 seconds, every 30 minutes. This is normal and should not be a cause for concern. The standby button is located just below the mains switch. Cleaning For general cleaning use a soft clean duster never use abrasive cleaners. The glass screen should be

cleaned carefully with a soft, lintfree cloth. Recycling For electrical products sold within the European Community. At the end of the electrical products useful life it should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice in your country.
