All our activities and developments therefore focus on a common goal Developing innovative and intelligent products and services so that the visions of today become reality tomorrow.

That is why increased availability of the existing infrastructure, accompanied by decreasing life cycle costs, is critical. Intelligent monitoring and diagnostic systems record the asset condition and evaluate targeted information. Thus, allow for optimized asset management, an efficient and targeted maintenance planning and the avoidance of unnecessary preventative maintenance. We understand the challenges railway operators are facing today. We are happy to help! We are happy to help! Creating maximum customer benefit is the driving force behind all activities of the group. The modules are specially designed for MPLs PIP3x Family of Industrial PCs, and supportTogether with the Intel Embedded GraphicsPIPs and can be used in all housings. It offers a flexible, costefficient possibility to control two displays with one PC. You can spend more time growing your business, by outsourcing time consuming business tasks. Our staff are fully trained experts in all aspects of business solutions. For less money and no upfront startup costs, DLD provides professional management support, web development services and software development support. DLD is committed to the development of sound and cost efficient business practices that help businesses thrive. Working together as partners, DLD helps to improve sustainability and maintain viable and successful businesses. Outsourcing is often associated with big business and multinational organizations. However outsourcing can be especially effective for not for profits and midsize businesses as well. Outsourcing allows businesses to hire the talent when and where it is needed without long term staffing costs. By outsourcing day to day operations and one time projects, business can concentrate on their core services and products. Outsourcing improves efficiency, reduces overhead costs and training requirements and saves valuable time.

The ability to think “outside the box” and understand the “big picture” are the cornerstones of today’s success. We are skilled at diagnosing problems and identifying solutions. Working together, we can help you to implement the right solution. Our sites are designed to reflect your vision and

values while meeting the needs of your target audiences. The process starts with a design consultation to ensure your website reflects your own personal brand. To this end DLD helps Clients to develop and maintain custom web based software to meet their business objectives. However, many organizations cannot afford to maintain a full time roster of the talent that they need. DLD can help address this shortfall. Our privacy policy protects personal and corporate information, received both directly and indirectly from you and your sources. To make sure we are the right fit for each other, we provide an initial introductory and assessment session free of charge. Follow case skid steer equipment discounts, contests, promotions. Reload to refresh your session. Its internal memory provides the capacity to store more than 50 FOUP handoffs. To extend its recording capacity, it can be configured to use its builtin diagnostics filtering.

With diagnostics filtering enabled, the E84 DLD ignores good handoffs and writes only failed handoffs to its internal memory. GCIs industry leading diagnostic software, E84 Analysis Application, is included with this tool. Coupled with GCIs E84 Analysis Application program, the E84 Data Logging Device is an indispensable tool to capture, analyze and resolve E84 handoff problems without interrupting the work stream. Disconnect the optical transceivers DB25 from its interface location on the top of the tool. Connect a serial cable between the DLD and a PC or E84 Handheld Tester and configure the DLD. After configuration, disconnect the PC or Handheld Tester from the DLD. Logged transactions can be uploaded at any time by connecting a PC or Handheld Tester to the DLDs serial port. Additionally, you can monitor the signals in realtime using a PC or Handheld Tester without interrupting the handoff operation.
