Be sure to leave feedback using the Help button on the bottom The availability of or the permission to consult records, archives, or manuscripts. The ability and opportunity to obtain classified, unclassified, or administratively controlled information or records. Electronic records. Records stored in a form that only a computer can process and satisfies the definition of a federal record, also referred to as machinereadable records or automatic data processing records including email. Historical researchers or requestors. A person approved to conduct research in OSD files for historical information to use in a DoD approved project e.g., agency historical office projects, books, articles, studies, or reports, regardless of the persons employment status. Excluded are Military

personnel assigned to OSD; OSD employees, contractors, and students conducting research in response to academic requirements. Records also referred to as federal records or official records. All books, papers, maps, photographs, machinereadable materials, or other documentary materials, regardless of physical form or characteristics, made or received by an agency of the U.S. Government under federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the U.S. Government or because of the informational value of data in them. The procedures for access to classified information will be used if the requested unclassified information is contained in OSD files whose overall markings are classified. f Except as otherwise provided in DoD Manual 5200.01 volume 3, no person may have access to classified information unless that person has been determined to be trustworthy and access is essential to the accomplishment of a lawful and authorized purpose.

g Persons outside the Executive Branch who are engaged in approved historical research projects may be granted access to classified information, consistent with the provisions of Executive Order 13526 and DoD Manual 5200.01 volume 1 provided that the OSD official with classification jurisdiction over that information grants access. h Contractors working for Executive Branch agencies may be allowed access to classified OSD Component files provided the contractors meet all the required criteria for such access as an historical researcher including the appropriate level of personnel security clearance set forth in paragraphs a and i of this section. No copies of OSD records and information may be released directly to the contractors. Separate authorizations for access to records and information maintained in OSD Component office files or at the federal records centers will not be required in accordance with Vol 3 of DoD Manual 5200.01, "DoD Information Security Program," February 24, 2012, as amended. For all other information, a staff member will be assigned to supervise the researchers copying of pertinent documents at the assigned facility. x If the records are maintained in the OSD Components working files, arrange for the material to be converted to electronic format for the researchers to review. xi Notify the National Archives, Presidential library, or military facility of the authorization and access conditions of all researchers approved to research OSD records held in those facilities. b Procedures for the DOS Foreign Relations of the United States FRUS series. 1 The DOS historians will i Submit requests for access to OSD files. The request should list the names and security clearances for the historians doing the research and an explicit description, including the accession and box numbers, of the files being requested. Make all necessary arrangements for the Advisory Committee to review any documents that are at the WNRC.

c Procedures for historical researchers not permanently assigned to the Executive Branch. 1 The WHSserviced Components heads, when required, will i Recommend to the DA, ODCMO, or his or her designee, approval or disapproval of requests to access OSD information. State whether access to, release, and clearance of the requested information is in the interest of national security and whether the information can be made available. If disapproval is recommended, specific reasons should be cited. ii Provide the location of the requested information, including but not limited to the office, component, information system or accession and box numbers for any records that have been retired to the WNRC. iii Provide a point of contact for liaison with the OSD Records Administrator if any requested records are located in OSD Component working files. 2 The OSD Records Administrator will i Process all requests from nonExecutive Branch researchers for access to OSD or WHSserviced Components files. The Security Division will contact the researchers and any assistants to obtain the forms required to reinstate or initiate the personnel security investigation to obtain a security clearance. Upon completion of the adjudication process, notify the OSD Records Administrator in writing of the reinstatement, issuance, or denial of a security clearance. vi Make a written determination as to the researchers trustworthiness based on his or her having been issued

a security clearance. vii Compile all information on the request for access to classified information, to include either evidence of an appropriately issued or reinstated personnel security clearance. Forward the information to the DA, ODCMO or designee, who will make the final determination on the applicants eligibility for access to classified OSD or WHSserviced Component files. If the determination is favorable, the DA, ODCMO or designee will then execute an authorization for access, which will be valid for not more than 2 years.

viii Notify the researcher of the approval or disapproval of the request. The request must contain A As explicit a description as possible of the information being requested so that identification and location of the information may be facilitated. B A statement as to how the information will be used, including whether the final project is to be classified or unclassified. C A statement as to whether the researcher has a security clearance, including the level of clearance and the name of the issuing agency. D The names of any persons who will be assisting the researcher with the project. If the assistants have security clearances, provide the level of clearance and the name of the issuing agency. E A signed copy of their agreement see Figure to safeguard the information and to authorize a review of any notes and manuscript for a determination that they contain no classified information. Each project assistant must also sign a copy of the letter. F The forms necessary to obtain a security clearance, if the requester is an FPA without an active security clearance. Each project assistant without an active security clearance will also need to complete these forms. If the FPA or assistant have current security clearances, their personnel security office must provide verification in writing to the OSD Records Administrators Security Manager. ii Maintain the integrity of the files being reviewed, ensuring that no records are removed and that all folders are replaced in the correct box in their proper order. iii If copies are authorized, give all copies to the custodian of the files at the end of each day. The custodian will forward the copies of the documents to the OSD Records Administrator for a declassification review and release to the requester. A For records at the WNRC, if authorized, provide the requested information in an electronic format. Review will occur only in the presence of an OSD Records Administrator staff member.

B Ensure that all staples are carefully removed and that the documents are restapled before the documents are replaced in the folder. C Submit all classified and unclassified notes made from the records to the custodian of the files at the end of each day of research. To avoid a possible delay, a tentative schedule will be established at the time that the review schedule is set. i For 24 boxes or fewer, review and scanning will take place simultaneously. DoD records and information are unique and often cannot be replaced should they be lost or damaged. In order to protect its collections and archives, the OSD Records Administrator has set rules that researchers must follow. 1 Researchers will work in room assigned. Researchers are not allowed in restricted areas. 2 Special care must be taken in handling all records. Exemptions and their explanations are provided in the Table to Appendix A. See chapter III of 32 CFR part 286 for further information. USDI SUBJECT DoD Information Security Program. USDI SUBJECT DoD Information Security. INDUSTRIAL SECURITY. LETTER.
