Le tableau suivant indique que les gammes de températures normales varient également selon les différentes parties du corps. Ainsi, les températures prises à différents endroits ne doivent pas être comparées directement. La siguiente tabla muestra que este rango normal de temperatura también varía según la parte del cuerpo. En consecuencia, las mediciones en diferentes partes no deben compararse directamente. ThermoScan is a registered trademark of Kaz Europe SA Kaz Europe SA Place Chauderon 18. The weight shall be approx. 100g, without the batteries. The Braun ThermoScan IRT 4000 series infrared ear thermometers are indicated for the intermittent measurement and monitoring of human body temperature by consumers in a home use environment. When the Braun ThermoScan is placed in the ear, your normal temperature range. This is easily done using Braun it continuously monitors the infrared radiation. The Braun ThermoScan ear thermometer turns off automatically after 60 seconds of inactivity. No lens filter is attached. Attach new, clean lens filter. Battery is too low to take correct Insert new batteries. The shape of the thermometer prevents it from being inserted too far into the ear canal to hurt the eardrum. However, as with any thermometer, proper technique is critical to obtaining accurate temperatures. Therefore, read the use instructions carefully and thoroughly. The following table shows that this

normal range also varies by site. Therefore, readings from different sites should not be directly compared. You can be assured to have taken an accurate temperature reading. The result is shown on the display 5. It flashes during the measuring process as long as the probe is secure. IRT 4520 This model stores the last 8 temperIt has to be clean and intact to ensure accurate readings. If the thermometer is ever accidentally used without a lens filter, clean the probe tip as follows Very gently wipe the surface with a cotton swab or soft cloth moistened with alcohol. <http://garagedeur.com/admin/userfiles/durst-labotim-manual.xml>

After the alcohol has completely dried out, you can put a new lens filter on and measure. If the pAttach new, clean lens filter. The thermometer cannot identify IRT 4020 Clear the display by a secure position of the probe. An accurate measurement was IRT 4520 Clear the display by not possible. Battery is too low to take correct Insert new batteries. Do you have any further Call Braun Infoline, questions. Prietaiso atmintiElementas yra pernelyg Ostatykite naujus elementus. Ask a question I have a braun thermoscan 4520. I purchased this unit about 6 years ago and it worked fine until about two months ago. No matter how I place the thermometer in my ear I only get the POS error. Ive cleaned the unit as well as changed the batteries and used new caps but it still gives me this error. Other than the position not being correct which cannot be my case as I know very well how to position the thermometer could this error be caused by maybe the unit finally reaching its end of life. Any help on how to get rid of the POS error to get this unit working again would be greatly appreciated. I purchased this unit about 6 years ago and it worked fine until about two months ago.
