doubleclick your language. OneTouch Keys These 4 keys give you instant access to 8 previously stored numbers. Shift To access OneTouch numbers 5 to 8, hold down Shift as you press the OneTouch key. Using the automatic document feeder ADF The ADF can hold up to 35 pages and feeds each sheet individually. Documents can be up to 215.9 mm wide and 297 mm long. Note To use the scanner glass, the ADF must be empty. Paper Type Item Plain paper Xerox Premier 80 gsm Xerox Business 80 gsm Mreal DATACOPY 80 gsm IGEPA XPress 80 gsm Recycled paper Xerox Recycled Supreme Transparency 3M CG 3300. While pressing the paper guide release lever, slide the adjusters to fit the paper size. Check that the guides are firmly in the slots. Make sure you do a test print first. Note How to load envelopes Before loading, press the corners and sides of the envelopes to make them as flat as possible. If the machine detects errors during fax transmission, it resends the pages of the fax that had an error. ECM transmissions are only possible between fax machines that both have this feature. Note Your machine can store the date and time up to 2 hours for MFC7420 or 4 days for MFC7820N if there is a power failure. You can change the number of seconds or minutes the machine takes after the last Scan or Copy operation before it returns to Fax mode.

When you change the size of paper you load in the paper tray, you will need to change the paper size setting at the same time so your machine can fit an incoming fax or a reduced copy on the page. The default setting is Med. When the beeper is on, the machine will beep when you press a key, make a mistake, or after you sent or received a fax. TX Lock MFC7420 only TX Lock lets you prevent unauthorized access to the machine. If it is not, press Fax to enter Fax mode. The default setting is Fax mode. How to dial You can dial in any of the following ways. Put the document face up in the ADF. Dial the fax number. Press Start. The machine starts scanning the document. Faxing from the scanner glass You can use the scanner glass to fax pages of a book. Do not pick up the handset of the external phone. Press Start immediately after dialling. For an example of automatic faxing, follow the steps in Faxing from the ADF on page 33. Manual transmission with an external telephone only If it is not illuminated in green, press Fax. Then, as soon as the phone line is free, the machine will start dialling and sending. If the memory is full, the machine will send the document in real time even if Real Time TX is set to Off . Your Cover Page includes the name stored in the OneTouch or SpeedDial memory. If you are dialling manually, the name is left blank. The Cover Page shows your Station ID and the number of pages you're sending. Make sure you have programmed the Station ID before continuing. See Setting the Station ID on page 22. If you only want to send a Cover Page with a particular fax, your machine will ask you to enter the number of pages you are sending so it can be printed on the Cover. If it is not illuminated in green, press Fax. These faxes will be sent at the time of day you enter in Step 4. If it is not illuminated in green, press Fax. You can choose the mode that best suits your needs.

The current fax reception will continue, with the remaining pages being stored in memory, subject to available memory. Press Start. Note You can use Secure Polling only with another Brother fax machine. Anyone who polls to receive a fax must enter the polling secure code. 4 6 Setup for Polling Receive Timer You can set the machine to begin Polling Receive at a later time. You just specify several destinations in Step 5. Afterwards, a Sequential Polling Report will be printed. If it is not illuminated in green, press Fax. When you dial a quickdial number, the LCD shows the name, if you stored it, or the number. The machine can store 200 SpeedDial numbers. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes or longdistance carriers and credit card numbers as OneTouch and SpeedDial numbers. The faxes stored in the MFC7420 memory will be deleted. However, if you select Backup PrintOn, the machine will print the fax, so you will have a copy if there is a power failure before it is sent to the PC. Before you use the remote access and retrieval features, you have to set up your own code. When you call the machine and enter your Remote Access Code 3 digits followed by give two short beeps and you must enter a remote command. Remote commands Change the Fax Forwarding or Fax Storage

settings. Dial your fax number. When your machine answers, immediately enter your Remote Access Code 3 digits followed by hear one long beep, you have messages. How to print a report Press Reports. Enter Copy mode Before making copies, make sure that Copy is illuminated in green. If it is not, press Copy to enter Copy mode. Load your document. Use the dial pad to enter the number of copies you want up to 99. Custom25400% allows you to enter a ratio from 25% to 400%. Press Start if you have finished choosing settings. The default setting is Auto. Suitable for documents that Auto contain both text and photographs.

Suitable for documents Text containing only text. Suitable for copying Photo photographs. Press Copy to illuminate it in green. These settings will remain until you change them again. This memorandum is intended to be a guide rather than a complete listing of every possible prohibition. In case of doubt, we suggest that you check with relevant authorities as to any particular questionable documents. NERGY Important safety instructions Read all of these instructions. Do not place anything in the path of received faxes. Do not touch a document during printing. Never push objects of any kind into this product through cabinet slots, since they may touch dangerous voltage points or short out parts resulting in a risk of fire or electric. Not all telephones will respond to incoming ringing when connected to the extension socket. The answer delay setting of this equipment shall not be set to less than the default setting as this will destroy Caller ID information. Note that some telephones are not compatible with this unit and dialling errors may result if the two devices are used together in other than quiet conditions. Brother cannot accept any financial or other responsibilities that may be the result of your use of this information, including direct, special or consequential damages. Brother is a registered trademark of Brother Industries, Ltd. All rights reserved. If this happens, your machine identifies the problem and displays an error message. The most common error messages are shown below. You can correct most problems by yourself. If you need more help, the Brother Solutions Center offers latest FAQs and troubleshooting tips. To check whether the machine has faxes in its memory see Checking if the machine has faxes in its memory on page 115. To check whether the machine has faxes in its memory see Checking if the machine has faxes in its memory on page 115. Document is jammed in the top of the ADF unit Take out any paper from the ADF that is not jammed.

Open the ADF cover. Pull the jammed document out to the left. WARNING After you have just used the machine, some parts inside the machine are extremely hot. When you open the front cover or back cover of the machine, never touch the shaded parts shown in the following diagram. Put the drum unit and toner cartridge assembly back into the machine. Close the front cover. Put the paper tray in the machine. 11 8 Paper is jammed at the back of the machine. Pull the jammed paper out of the fuser unit. If the jammed paper cannot be pulled out easily, push down the blue tab with one hand as you gently pull out the paper with the other hand. Pull out the drum unit and toner cartridge assembly. Hold down the lock lever on the left and pull the toner cartridge out of the drum unit. If the copy looks good, the problem is probably not your machine. Check the chart below and follow the troubleshooting tips. The Brother Solutions Center offers the latest FAQs and troubleshooting tips. Brother's ECM feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. Make sure that "Use Printer Offline" is unchecked. 11 13. Run the Repair MFLPro Suite program on the CDROM. This program will repair and reinstall the software. If there is no paper, load a new stack of paper into the paper tray. If there is paper in the paper tray, make sure it is straight. If the paper is curled, you should The LCD shows No Paper Fed or straighten it. The fixing unit may be smudged. Call Brother or your dealer for service. You may clear the problem by wiping the scanner window with a soft cloth. High temperatures and high humidity will cause paper to curl. If you don't use the machine very often, the paper may have been in the paper tray too long. Turn over the stack of paper in the paper tray.

Troubleshooting and routine maintenance Routine maintenance CAUTION The drum unit contains toner, so handle it carefully. Remove any paper that is in the paper tray. Wipe the inside and the outside of the paper tray with a soft cloth to remove dust. Before you clean the inside of the machine, turn off the machine's power switch. Close the front cover. Plug the machine's power cord back into the electrical socket first, and then plug in the telephone line cord. Turn on the machine's power switch. 11 24 Cleaning the corona wire We recommend placing the drum unit and. When the toner cartridge is running low, the LCD shows Toner Low. Actual page count will vary depending on your average type of document i.e., standard letter, detailed graphics. Remove the protective cover. Insert the new toner cartridge in the drum unit until it clicks into place. If you put it in properly, the lock lever will lift automatically. If the LCD shows Change Drum Soon, the drum unit is near the end of its life and it is time to buy a new one. Even if the LCD shows Change Drum Soon, you may be able to continue printing without having to replace the drum unit for a while. Note Discard the used drum unit according to local regulations, keeping it separate from domestic waste. Be sure to seal the drum unit tightly so toner powder does not spill out of the unit. Checking the Page Counters You can view the machine's page counters for copies, printer pages, reports and lists, faxes or a summary total. Incoming calls to the voice number, will have the standard ring pattern of long, long tone, followed by a pause, repeated, while the new fax number will have a different ring pattern of three short bursts of ring, repeated at regular intervals. The Caller ID Appears on the Display When Your Telephone Rings As your telephone rings, the display shows you the caller's phone number or name if the name has stored in the OneTouch and SpeedDial.

This way, when you get an incoming call, you can identify the number being called by its ring. To change the setting, repeat Steps 13; Step 2 is where you can select either On or Off. Call Waiting beeps caused by incoming calls on your main number can affect fax transmissions. The Caller ID Appears on the Display When Your Telephone Rings As your telephone rings, the display shows you the caller's phone number and name if available. Once you pick up the handset, the caller's ID disappears. Each phone number has its own Distinctive Ringing pattern, so you will know which phone number is ringing. You can scroll through Caller ID information to review those calls made to your machine. If you let the machine answer first, you will have to go to the machine so you can press Hook to transfer the call to the cordless handset. A 10 Connecting an external telephone answering device. Improper Setup Do not connect a TAD elsewhere on the same phone line. Example for Australia When the TAD answers a call, the LCD shows Telephone. Note Your machine is equipped with an internal battery that will keep the date and time information for up to about 2 hours for MFC7420 or 4 days for MFC7820N. Most number keys have three or four letters printed on them. The Brother machine uses the new number to simulate a dedicated fax line. Dual Access Your machine can scan outgoing faxes or. Overseas Mode Makes temporary changes to the fax tones to accommodate noise and static on overseas phone lines. Pause Allows you to place a 3.5 second delay in the dialling sequence stored on OneTouch keys and SpeedDial numbers. Tone not available in New Zealand A form of dialling on the telephone line used for Touch Tone telephones. Transmission The process of sending faxes over the phone lines from your machine to the receiving fax machine. Specifications and printed materials are subject to change without prior notice.

For the latest drivers, go to the Brother Solutions Center at Maximum 1200 x 1200 dpi scanning with Windows the Brother Utility. Dedicated "Scan". Drum Unit Life Expectancy DR2025 Note There are many factors that determine the drum life, such as temperature, humidity, type of paper, toner you use and number of pages per print job. S 9 You can connect your machine to a network for Network Printing, Network Scanning and PC Fax Send. Simply cut out the card and fold it to fit your wallet or organizer. Keeping it handy will help you derive the full benefit of your machine's Fax Forwarding and Remote Retrieval features.
