TUNING YOUR DETECTOR First switch on knob A and whilst depressing Auto Tune Button C turn clockwise until a faint noise is heard and the meter needle centres. Normally this effect produces an increase or decrease in the audio signal when the search head is raised from the ground. This effect can be controlled in two ways. If the search head is kept at a constant height the effect of the ground will be constant. The technique is learned from careful analysis of the audio signals coming from the detector. This ensures maximum depth penetration. There is a maximum detection range and a large gap between head and ground reduces the effective depth of the search. See diagram 6. Corrosion can occur in vital parts of the delicate electronic circuitry. It is, therefore, recommended that precautions such as covering the control box with polythene be taken to avoid damage. Ensure they are tight and the batteries are securely clipped into place. Radio transmission from passing taxi or vehicle using radio transmitter equipment. Loose speaker, in which case the speaker needs fastening back into place. The Detector Drifts Out of Tune Temperature drift caused by the change in air temperature when a machine is moved from a house or a car into the open. Still in reasonable condition, see photos. It has 11 pages, it is used but clean. Standard postage included, other options are available. Proof of posting is always obtained. You are the light of the world. You are currently using an outdated browser. To optimise your browsing experience, please update your browser. Depth range up to a maximum of 100 cm deep for large objects. Registered shipping. For the best chance of winning,

increase your maximum bid. Please check your email account for more details. We have thousands of new lots everyday, start a new search. <http://www.sushi-king.com.vn/imagesflashupload/fluke-724-temperature-calibrator-manual.xml>

Please register now so you are approved to bid when auction starts. All items over 35 will include insured rates. All items over 35 will include insured rates. Our terms are cash, credit card or debit card. A 3.6% surcharge will be added to credit card transactions. We are unable to accept cash payments in excess of 5000. Cheques must be cleared before the removal of goods. Estimates Estimates are designed to help buyers gauge what sort of sum might be involved for the purchase of a particular lot. The lower estimate may represent the reserve price. Estimates do not include the buyer's premium. Estimates are prepared some time before the sale and may be altered by announcement before the sale. They are in no case definitive. Returns Please inspect all lots purchased upon collection or postal receipt. Returns can only be made within 7 days of receipt, with written explanation of the reasons why. Bulk lots cannot be returned, thus we strongly advise the viewing of such lots in person. The nature of what constitutes a bulk lot is determined at James and Sons Auctioneers discretion. Returned lots will only be accepted if returned in the same condition they were received in. Bidders should be certain of the nature of each lot before bidding. These items are considered sold as seen and should only be bought in full knowledge and acceptance of these terms. Buyers Premium The conditions of sale oblige buyers to pay a buyer's premium at 15% on the hammer price of each lot purchased. Buyers Registration All attending buyers are asked to collect a bidding paddle before the commencement of the sale. Should you be the successful buyer of any lot please ensure that your paddle can be seen by the Auctioneer. Please return your paddle at the end of sale. Commission Bidding Commission bids may be left with the auctioneers indicating the maximum amount to bid excluding buyer's premium. They will be executed as cheaply as possible having regard to the reserve if any and competing bids.

If two buyers submit identical commission bids the auctioneer may prefer the first bid received. Please enquire in advance about our arrangements for the leaving of commission bids by telephone, submission form or email. All absentee bids should be received before the auction commences, we cannot guarantee to accurately execute bids received once the auction has commenced. All online and email bids must be received by no later than the day commencing the sale. Telephone Bidding If you are unable to come to the auction it may be possible to bid on the telephone for higher value lots. Please note that this service is for lots with an estimate of 250 or more. The number of lines is limited so we would urge serious telephone bidding only and ask that you be prepared to bid over the top estimate. It would be advisable to leave a maximum covering bid in case we are not able to contact you by telephone. All lines must be booked and confirmed in writing before the day of the auction and preferably some time in advance. Telephone bidding involves many variables and whilst we take every care to ensure the smooth running of this service, we cannot be held liable if your bids are missed for any reason. Online Bidding James and Sons Auctioneers offer an online bidding service via thesaleroom.com for bidders who cannot attend the sale. In completing the bidder registration on www.thesaleroom.com and providing your credit card details and unless alternative arrangements are agreed with James and Sons Auctioneers you 1. Authorise James and Sons Auctioneers, if they so wish, to charge the credit card 3.6% surcharge on credit card payments given in part or full payment, including the fees, for items successfully purchased in the auction via thesaleroom.com, and 2. Confirm that you are authorised to provide these credit card details to James and Sons Auctioneers through www.thesaleroom.com.

com and agree that James and Sons Auctioneers are entitled to ship the goods to the card holder name and address provided in fulfilment of the sale. Please note that any lots purchased via thesaleroom.com live auction service will be subject to an additional 3.6% commission charged at

the rate imposed on the hammer price. General Sales A charge of 5 is payable for every individual lot entered, per sale. Lot Fees are payable whether item sells or not. If an item sells, a seller's premium at the rate of 20% of the hammer price of each lot is also payable by the seller to James and Sons. Reserves If you do not wish to sell an item below a certain price, you can agree a reserve price on the item with James and Sons Auctioneers. All goods are automatically offered for sale WITHOUT RESERVE unless specifically agreed in writing with James and Sons Auctioneers before the start of the sale. If set, the reserve will only apply to the first sale which the item is entered. If a lot is unsold the reserve price will automatically be dropped by at least 20% or the nearest lowest bid for a second sale, unless specifically agreed to the contrary in writing with James and Sons Auctioneers. James and Sons Auctioneers may at its option sell at a hammer price below the reserve, provided that James and Sons Auctioneers pay the seller the sale proceeds which the seller would have received would such lot have sold at the reserve price. Unsold Lots If you do not wish to drop the reserve for a second sale, the items must be collected before it is lotted up in the next sale within 28 days of the first sale. If items are unsold after 2 sales, the seller must contact James and Sons Auctioneers within 28 days to collect these items and pay the lotting up fees applicable or the lot may be entered into subsequent sales with NO reserve.

Storage If the seller fails to make specific arrangements for collection of the lots within five days of the sale, James and Sons Auctioneers shall charge storage fees of 1 per lot per day until collected by the seller. James and Sons Auctioneers also reserve the right to dispose of any items still uncollected after five days following a sale, and a minimum charge of 20 will be made of this disposal.

Instructions As James and Sons Auctioneers are auctioneers all goods delivered their premises or collected on behalf of James and Sons Auctioneers will be deemed to be for sale by auction unless otherwise agreed to the contrary in writing. All goods will be entered into those sales that James and Sons Auctioneers consider suitable, and sold at the auctioneer's discretion. Any items considered unsuitable for by James and Sons Auctioneers will be disposed of, and any costs incurred charged to the seller. Catalogues James and Sons Auctioneers sales are fully catalogued. Lots are also catalogued online and available to a vast number of potential buyers. Where appropriate James and Sons Auctioneers take digital photographs to illustrate these catalogues. All sales are also well advertised in the local press and in specialist publications to ensure the largest possible number of interested people see the items. General sales are uncatalogued. Private Sales If a lot fails to reach its reserve, the seller authorises James and Sons Auctioneers for a period of 35 days following the auction to sell the lot privately for a price that will result in a payment to the seller not less than the net amount after payment to James and Sons Auctioneers of the sellers commission, buyers premium and expenses to which the seller would have been entitled had the lot been sold to a price equal to the reserve.

Settlement After The Sale On the settlement date 35 working days after the completion of the sale, where net sale proceeds are in excess of 2 sterling a cheque will be printed and posted to the seller at the seller's risk. Preparation For Sale James and Sons Auctioneers have sole and absolute discretion regarding the grouping of property into lots and in deciding which sale a lot shall be entered into. Withdrawn lots A MINIMUM charge of 20 per lot OR 10% of the reserve whichever is greater will be levied for any withdrawn lots. The seller may not withdraw property from the sale after the date on which the catalogue is sent to print. James and Sons Auctioneers may withdraw lots from the sale without any liability to the seller if James and Sons Auctioneers believe that i There is doubt as to its authenticity or attribution, ii any of the sellers' representations or warranties are inaccurate in any way, or iii the seller breaches any provisions of the conditions of sale. Agreement Each seller, by entering items for sale with James and Sons Auctioneers acknowledges his or her acceptance of James and Sons Auctioneers full conditions of sale, and the terms of any notices and other conditions in the sale catalogue. Collection of goods Where items have been collected by James and Sons Auctioneers, a collection charge of a minimum of 50 will be levied, unless otherwise stated

in writing by James and Sons Auctioneers. Shipping Shipping will be charged at standard Post Office rates plus packaging. All items over 35 will include an insured rate. All items over 35 will include insured rates. All items over 35 will include insured rates. Our terms are cash, credit card or debit card. A 3.6% surcharge will be added to credit card transactions. All items over 35 will include an insured rate. Something went wrong. Get the item you ordered or your money back. Material Cast Aluminium. Fitting Position Lower Front Axle. Fitting Position Right Rear.

User Agreement, Privacy, Cookies and AdChoice Norton Secured powered by Verisign. It incorporates additional instructions and examples, and includes updates to the Annexes. Most of the additions result from Some of these elements reflect changes in MARC formats over the past two years, while others were necessary for providing more complete and accurate descriptions of online resources, in particular online resources with multiple manifestations. The 2014 edition was prepared by the ISSN Review Group. Successive draft versions were circulated throughout the ISSN Network between 2013 and 2014, and very useful comments and suggestions were received. The ISSN Network consists of the International Centre and National Centres established in those countries which have acceded to the Statutes of the ISSN Network. In developing these rules, care has been taken to ensure so far as possible compatibility and harmonization with international standards such as the International Standard Bibliographic Description ISBD, Consolidated edition and the practices of other International systems such as the AngloAmerica Cataloguing Rules AACR, 2nd edition and RDA Resource Description and Access. A bibliographic resource may be in any medium or combination of media and may be tangible or intangible. Continuing resource A publication, in any medium, that is issued over time with no predetermined conclusion and made available to the public. Serial A continuing resource issued in a succession of discrete issues or parts, usually bearing numbering, that has no predetermined conclusion. e.g. Journals, magazines, electronic journals, ongoing directories, annual reports, newspapers, monographic series, and also those journals, magazines and newsletters of limited duration that otherwise bear all the characteristics of serials e.g., newsletter of an event.

Ongoing integrating resource A continuing resource that is added to or changed by means of updates that do not remain discrete and are integrated into the whole. Ongoing integrating resources have no predetermined conclusion. e.g. Databases, Web sites and looseleaves that are updated over time with no predetermined conclusion. ISSN International Standard Serial Number An eight digit number, including a check digit and preceded by the alphabetic prefix ISSN, assigned to a continuing resource by the ISSN Network. ISSN Linking ISSN ISSN designated by the ISSN Network to enable collocation or linking among the different medium versions of a continuing resource. Key title The unique name for a continuing resource, established by the ISSN Network and inseparably linked with its ISSN. The use of these definitions is associated with the application of the following model which was developed as part of the revision of AACR2, Chapter 12. The above definitions and other definitions are listed in Annex 1 Glossary. Continuing resources are bibliographic resources issued over time with no predetermined conclusion, they include serials and ongoing integrating resources. All continuing resources, whether past, present, or to be produced in the foreseeable future, whatever the medium of production, are eligible for ISSN assignment. Eligibility does not necessarily mean ISSN assignment in practice. Section 0.3 below provides criteria for determining whether or not a continuing resource shall be ISSN assigned in accordance with the current policy of the ISSN Network. ISSN are assigned to the entire population of serials. However, National Centres can decide to exclude ephemeral serials or serials of purely local interest from systematic ISSN assignment see Section 0.7. ISSN are assigned to ongoing integrating resources which fulfill all the inclusion and exclusion criteria listed hereafter.

National Centres can decide to exclude ephemeral ongoing integrating resources or ongoing integrating resources of purely local interest from systematic ISSN assignment see Section 0.7.

Meeting only one of the criteria is not sufficient for ISSN assignment. These criteria apply to all the categories of ongoing integrating resources, whether print or electronic databases, websites, wikis, print looseleaf services, etc. Although blogs are considered to be serials, these same criteria should be applied to blogs. Editorial note If a part of an ongoing integrating resource part of website, for instance is eligible for ISSN assignment, e.g., a newsletter that is part of the website is assigned an ISSN, this does not mean necessarily that the whole website is eligible for ISSN assignment. Generally, editorial responsibility will consist of more than one individual; 3. There is a consistent title i.e., a title which remains consistent when the resource is updated and the title is prominently visible on the resource; 4. There is a valid URL i.e., a URL leading to the actual resource; 5. The resource has subjectrelated content or has identified subjectrelated audience. This ISSN is permanently linked to the key title, a standardized form of title derived from information appearing on the continuing resource. A key title is unique to a particular continuing resource. Titles which would otherwise not be unique are made unique by the addition of qualifying elements. In cases where the title changes sufficiently to warrant creating a new key title, a new ISSN is assigned. In cases where the medium of the continuing resource changes, a new ISSN and a new key title are assigned as well see Section 2.3. ISSN, the linking ISSN, provides for collocation or linking among the different medium versions of the same continuing resource. The same ISSN is associated with one or more ISSN that have been assigned to a continuing resource issued in different media see Section 3.

Each Centre receives limited blocks of numbers. In using blocks of ISSN, National Centres adhere to the following procedures For online resources, determining the country of publication is based on the place of the publisher of the resource not on the place of the distributor or server. If the place and the country of publication are not given on the resource, information found in an external source can be used. The International Centre assigns ISSN to continuing resources published in countries where no National Centre exists. In order to avoid double assignments, one National Centre may assume responsibility for particular imprints or publishers irrespective of the place of publication. Such an arrangement can only be made with the agreement of the International Centre and the appropriate National Centre. The list of the agreements between ISSN Centres is published as Annex 5 List of the agreements for the ISSN assignments to continuing resources issued by multinational publishers. Continuing resources published by national commissions of international organizations and by representative offices of national administrations or services abroad embassies, military or economic representative offices are, however, assigned ISSN by the National Centre of the country of publication except in cases when a specialized centre exists. If the international organization is not listed in the Yearbook of International Organizations, the National Centre of the country where the organization is located is responsible for the ISSN assignment. Editorial note if the international organization is responsible for the intellectual content but does not publish the resource, this instruction is not relevant. Consequently, this publication is not under the responsibility of the ISSN International Centre but under the responsibility of the ISSN Centre of the United Kingdom.

Digital reproduction of a ceased print serial when the content is owned by a current publisher If the content of a digitized version of a dead print serial is owned by a current publisher, the ISSN assignment should be made by the National Centre responsible for ISSN assignment to the resources of that publisher. This rule applies also The assigning Centre should liaise with other Centres that may have an interest in the resource those Centres which have already assigned ISSN to other medium versions, in particular to the print version to avoid the possibility of double assignments occurring. If the original print version of the dead serial has not been already identified, the assigning Centre can also ask permission to assign ISSN to both the print and the digitized versions at the same time from the National Centre that would normally be responsible for the print version. Also, it sometimes happens that a provisional ISSN assignment is made by one

Centre but the resource turns out to be published in another country. In all of these situations, transfer of responsibility for an ISSN assignment is necessary. In some cases the transfer is initiated by the country to which the resource has moved or which turns out to be responsible for a resource after publication. In all cases, the ISSN Centres involved shall follow, step by step, the procedure below National Centres also register continuing resources in response to requests from users. Systematic retrospective registration is not required for ISSN Network purposes. National Centres may define their own policies in accordance with national requirements. For this reason, comprehensive registration, i.e., complete coverage of a country's continuing resources, is a fundamental goal. It is recognized, however, that there may be continuing resources which, as a matter of local policy, may be given lower priority or even excluded as far as comprehensive coverage is concerned.

For example, National Centres may, as a matter of local policy, exclude ephemeral continuing resources and continuing resources of purely local interest from comprehensive registration whether they are published in printed form or electronically see Section 0.3, even if requested by a user. Most categories of resources should always be assigned ISSN, provided that they are not ephemeral continuing resources or continuing resources of purely local interest excluded from comprehensive registration by a National Centre. These include continuing resources for which a valid request has been received according to the criteria in Section 0.3; ceased resources that fit the general criteria for registration no matter how old; and resources with scholarly or research value regardless of whether retained in the hosting institution of the National Centre or not. In cases where National Centres are uncertain how they should proceed in defining a policy on what resources they might exclude from registration, they should seek advice from the International Centre. Registration is not made without visual proof of the existence of the continuing resource, that is, the user requesting the assignment is asked to supply an issue of the continuing resource, copies of the pages containing the bibliographic information necessary for registration, or access information for the online resource. ISSN assignment in advance of publication prepublication When a publisher requests an ISSN for a continuing resource that is not yet published so that the ISSN may be printed on the first issue for instance, the publisher shall provide all the necessary information and documents together with the ISSN request. The registration of an ISSN assigned to a prepublication is delayed until the National Centre receives a copy of the first issue or other acceptable proof of the existence of the continuing resource. Provisional registration in the form of work records is possible.

Work records are provisional ISSN records based on prepublication information. These records can be viewed only by the National Centres and not by subscribers of the ISSN Register as available at. Cancellation of publication When a publication is cancelled before the appearance of the first issue, the ISSN that was assigned on a provisional basis is suppressed and cannot be reassigned. Circulation of requests Requests from users in a given country are addressed to the National Centre of that country. The National Centre processes all requests concerning its own national continuing resources output, and forwards requests relating to continuing resources published by international organizations or multinational publishers, or to continuing resources published outside its country see Section 0.6 to the appropriate Centre. Time of response to requests At the discretion of the National Centre, a request for assignment of an ISSN to an individual title is answered as quickly as possible, preferably within 10 business days after receipt of the request. Urgent requests may be communicated to the National Centre by telephone, fax or email providing that the supporting documentation is available. Requests concerning a limited number of continuing resources should be answered within two months. Requests which involve a large number of continuing resources are negotiated with the appropriate Centre. In cases where a National Centre is unable, or fails, to respond to a request within the prescribed time limits the International Centre assigns the ISSN and informs the National Centre of the assignment. Records may also be entered in a specific Excel

template provided by the International Centre, in case a National Centre does not have the technical facilities to produce a suitable electronic file of ISSN records, or to use the cataloguing client of the information system of the International Centre.

Records are also established directly in the ISSN Register by the International Centre and those National Centres which use the cataloguing client of the information system of the International Centre. Records of continuing resources issued in nonroman alphabets or scripts are romanized by the National Centres before transmission to the International Centre or before creation in the information system of the International Centre in accordance with appropriate ISO standards, or other standards accepted by the ISSN Network. When such romanization is required, National Centres are highly recommended to record additionally the title proper, variant title, issuing body and publication information name and location of the publisher in original nonroman scripts in accordance with MARC 21 or UNIMARC instructions see Section 24. Once a record has been entered in the ISSN Register, National Centres endeavour to notify the International Centre of any changes which may occur after initial input. Amendments or replacements are transmitted to the International Centre in accordance with the procedures used for the initial transmission of the records. Because of its bibliographic data this ISSN record represents the authority record for continuing resource titles. These include Some of these are The data elements required are listed in the Table of ISSN data elements Section 1.2 below. Short ISSN records The mandatory data elements for the short records are shown in the Table of ISSN data elements Section 1.2 below. Short records must only be used for publications which are considered by the ISSN National Centre to be of an ephemeral nature or of purely local interest. National Centres should be able to upgrade a short record to full status if requested to do so by another Centre or a user. All note fields are allowed in ISSN records fields 5XX in MARC 21, 3XX in UNIMARC.
